Small tools for everyday things.

Use them yourself, or ask your agent.

The plan, version 5: 76 tools, one page each. Website first, plus the NT App and the nt command. NT is a free set of tools for everyday chores, for people who are not "tech people": money, taxes, forms, converters, files, photos, safety, and the daily weather and news. It is the lead project, featured first on dbaney.com. Prepared for Donovan Baney, November 4, 2026. Plan only: nothing is built or published.

1. The NT website

Start here. Type what you need, and use the tool right in the browser. Files stay on your device.

2. The NT App

Free for Windows, Mac, and Linux, for jobs on your own files: storage, photos, folders, big videos.

3. The nt command

One command so any agent can use every tool, with a preview and undo.

Plus your AI

Add NT once to Claude, ChatGPT, Grok, or Grok Bot. Then just talk.

House rules for every tool

- **Free, and free to run.** Work happens on your own device, so NT pays for no servers or AI (page 9).
- **You see it first.** A preview before any change, then one big button.
- **Undo always.** Files go to the Trash first. Nothing is deleted outright.
- **You stay in charge.** NT never sends, pays, signs, files, or submits on its own.
- **Your info stays yours.** Files and My Info stay on your device unless you share them.
- **Official sources only** for tax, legal, health, money, and weather.
- **Tested before it ships**, with a pass bar for every tool (page 4).

New in version 5

Five on-device converters, a page on what runs where and what it costs, tool search everywhere, the nt command, a repeatable method for picking tools, and four tools it found: Scam Recovery Plan, Credit Report Check, New Phone Setup Guide, and Benefits Finder. Four weak tools were cut.

Ship these 5 first

Save Me Money It turns a bank download and your email into a ranked list of real savings, and every dollar traces back to your own rows.

Form Filler Any PDF becomes a few simple screens on a phone, filled from My Info, with a ready-to-sign PDF at the end.

Tax Filing Helper Free filing, done with you: NT gets the free official route ready and stops on the review page. You press Submit.

Photo Duplicate Finder The NT App's showcase. Years of photo copies cleared in two clicks, and Undo always works.

Morning Briefing A habit people keep: weather alerts first, then their day, bills due, and three calm headlines.

Effort S: about a day of build time. M: 2 to 4 days. **Wow** 1 to 5: how much it helps and how much a stranger reacts to the clip. Our estimates. All 76 tools are on page 2.

ALL TOOLS 76 TOOLS IN 10 GROUPS

Everything NT does

"Device" runs on your own phone or computer, on the website or in the NT App. "App" needs the NT App. "Live" uses free official data, like the weather service.

Budget and saving

01	Save Me Money	M/5
02	Receipt to Sheet	S/4
03	Subscription Finder	S/4
04	Monthly Budget	S/4
05	Bill Due Reminders	S/4
06	Warranty Keeper	S/3
07	Medical Bill Check	M/5
08	Spending Check-in	S/4
09	Savings Goals	S/4
10	Debt Payoff Planner	S/5
11	Bill Call Prep	S/4
12	Cheaper Plan Finder	S/4
13	Price Drop Watch LIVE	S/3
14	Credit Report Check	M/5
15	Benefits Finder	S/5

Taxes

16	Tax Filing Helper	M/5
17	Bank CSV to Taxes	M/5
18	Tax Checklist	S/4
19	Tax Folder Organizer	M/4
20	Mileage Log	M/3

Forms and paper

21	Form Filler	M/5
22	Form Finder LIVE	M/5
23	PDF Combine	S/3
24	Phone Photo to Scan	M/4
25	Letter Explainer	S/5
26	Lease Red Flags	S/4
27	Letter Kit	S/3
28	Big Print	S/3
29	Insurance Cards	S/3
30	Emergency Binder	S/4

Converters

31	Image Converter DEVICE	S/5
32	Video Converter DEVICE	M/5
33	Audio Converter DEVICE	S/4
34	Document Converter DEVICE	M/4
35	Unit Converter	S/3

Files, photos, and storage

36	Storage Checker APP	M/5
37	Photo Duplicates APP	M/5
38	ID Photo Maker	M/4
39	Share-Safe Photos	S/4
40	Large File Finder APP	S/4
41	Downloads Tidy APP	S/4
42	Desktop Cleanup APP	S/4
43	Screenshot Cleanup APP	M/4
44	Folder Organizer APP	M/4
45	File Mover APP	S/4
46	Bulk Rename APP	S/4
47	Old Phone Import APP	M/4
48	Find a Lost File APP	S/4

Daily briefings

49	Morning Briefing LIVE	S/5
50	Weather Briefing LIVE	S/4
51	News Briefing LIVE	S/4

Email, calendar, and contacts

52	Email Organizer	M/5
53	Newsletter Cleanup	S/4
54	Bills from Email	M/4
55	Calendar Cleanup	M/4
56	Family Calendar	S/4
57	Syllabus to Calendar	S/5
58	Appointment Prep	S/3
59	Contacts Cleanup	M/4
60	Address Labels	S/3

Home and health

61	Recipe to List	S/4
62	Weekly Meal Planner	S/4
63	Medicine Schedule	S/4
64	Home Inventory	M/3
65	Moving Checklist	S/3
66	Calorie Counter	M/4
67	Workout Plan	S/4
68	New Phone Setup	S/5

Work and school

69	Invoice Maker	S/4
70	Job Tracker	S/4
71	Resume Formatter	S/3
72	Voice Memo to Notes	S/4

Safety

73	Scam Check	S/5
74	Scam Recovery Plan	S/5
75	Password Checkup	S/4
76	Account Recovery Kit	S/3

Numbers match the tool pages. Cut in version 5 by the method on page 3: Unit Price Checker, Coupon and Cashback Checklist, Bill Splitter, and Notes to Flashcards. File Converter became five converters.

HOW WE PICK TOOLS A METHOD WE REPEAT EVERY QUARTER

Help with the chores that cost the most

Each tool has to earn its place with real evidence, not a hunch. We run this list again every quarter and cut what doesn't help.

1. Collect chores from public evidence

- **Government data:** FTC fraud reports, IRS burden estimates, CFPB complaint data, USA.gov services.
- **Surveys** from research groups like Pew Research.
- **Help forums and search trends:** the questions people ask again and again, like "storage full" or "file type not supported".
- **People who write to us** through a feedback button (no tracking).

2. Score each chore from 1 to 5

- **How often** it comes up, and for **how many people**.
- **Cost of the problem:** money, hours, or stress.
- **Gain over what's free today.** If a good free tool already exists, we point to it instead.

3. Two gates every tool must pass

- **Safety:** it can help without NT ever sending, paying, signing, or deleting.
- **Reliability:** tested code can do the exact part, and a tiny local model passes the tool's test set. If not, it waits.

4. Rank, build, and re-check

Rank by how often times how many people times the cost of the problem, then gain. Build from the top. After launch, a tool that misses its pass bar or that people don't use gets fixed or cut, and the changelog says why.

What we never count

Clicks or time spent. We want people done fast.

This round

Tool	DECISION	EVIDENCE	OFTEN	GAIN	SAFE
Scam Recovery Plan	Added	FTC: about 3 million fraud reports and $15.9 billion lost in 2025. People 50 and older reported $4.3 billion.	5	5	5
Tax tools	Kept, top	IRS estimate: 11 hours 27 minutes per individual return, and $49.76 billion out of pocket across 170.1 million returns (about $290 each).	4	5	5
Save Me Money, Subscription Finder	Kept, top	C+R Research survey: people guessed $86 a month on subscriptions; their itemized total was $219.	5	4	5
New Phone Setup Guide	Added	Pew Research: 48% of older internet users said they usually need someone to set up a new device or show them how.	3	4	5
Credit Report Check	Added	FTC: free weekly reports from all three bureaus became permanent in 2023, at AnnualCreditReport.com.	3	4	4
Benefits Finder	Added	USA.gov runs an official Benefit Finder. NT's job is plain words and a papers checklist.	3	5	4
Converters	Added	Requested by Donovan. How often people hit "file not supported": to measure with search-trend data before launch.	5	3	5
Bill Splitter	Cut	Free payment apps already split bills well. Little gain.	4	2	5
Unit Price Checker	Cut	Many store shelf tags already show unit prices. Low cost of the problem.	3	2	5
Coupon Checklist	Cut	Hard to make reliable, and risky links. Fails the reliability gate.	4	2	2
Notes to Flashcards	Cut	Chat apps already do this well without NT.	3	2	5

Scores are our judgment from the evidence. Sources are listed in PLATFORM-SOURCES.md. The tax per-return cost is our division of the IRS totals. The Pew figure is from 2017, so it is due for a fresh source.

RELIABILITY PROMISE APPLIES TO EVERY TOOL

NT has to just work

People will trust NT with their money, forms, and family photos. These rules apply to every tool, in every app, every release.

Tested code does the exact work

Math, money totals, dates, file moves, and form filling are done by tested code, not by the AI. The AI talks, asks, and explains. That is why NT works the same in a big chat app and a small local model.

Every tool has a test set and a pass bar

Each page lists its test set and pass bar. A release is blocked if any tool misses its bar. Money tools must match to the cent. File tools must undo exactly.

Real runs, recorded

Before each release we run every tool in every supported app (Claude, ChatGPT, Grok, Grok Bot, the NT App, coding tools, and a small local model) on made-up files, and save the recordings.

Preview and undo, always

Nothing changes before you say yes. File tools keep an undo journal and use the Trash. Chat tools give you a file to check before you import it.

Official sources only for serious things

Tax, legal, health, and weather tools use allowlists of official sites (like irs.gov, weather.gov, and USDA), show the link, and show the form's revision date.

Versioned releases, public changelog

Every tool and skill has a version number. Each release has a plain-words changelog: what changed, what got fixed, and what we know is still weak.

Honest limits

When NT isn't sure, it says so and stops. Each tool lists its known limits. We never fake a number, a source, or a result.

Private by default

No account, no ads, no tracking. The NT App works offline except for weather, news, forms, and updates, and it lists every time it goes online.

How we check each kind of tool

Money and taxes	Answer-key files in many bank layouts. Totals exact to the cent. A person who knows taxes reviews all plain-language text before release.
Forms	A set of real blank government forms (fillable and scanned). Field detection, labels, and filled values scored against an answer key. Every form opened in three PDF readers.
Files and photos	Test folders on Windows, macOS, Ubuntu, and Omarchy with planted files. Zero files lost, and undo restores every path exactly, or the release fails.
Live data	Recorded responses from the weather service, feeds, and form sites, so tests repeat exactly. Severe weather alerts are always shown first.
Health	Safety lines checked in every output: not medical advice, see a doctor for conditions, gentle starting levels.

INSTALL FOR EVERYONE

Add NT in one step

Pick where you want NT. Do it once. After that, you just ask.

Claude

1. On a computer, open **Settings**, then **Capabilities**, and turn on **Code execution and file creation**.
2. Click **Customize**, **Plugins**, **Add**, **Upload plugin**, and pick the NT file from the NT website.

No Plugins page? Use **Customize**, **Skills**, **+**, **Upload a skill**, one NT skill at a time. Which plans show Upload plugin: TO CONFIRM

ChatGPT

1. Open **Plugins** on the web or desktop app.
2. Search **NT**, open it, and press **+**.

NT shows in search after OpenAI reviews it: TO CONFIRM

Grok

1. Go to **grok.com/skills**, choose **New Skill**, then **Upload a file**.
2. Pick the NT skill file from the NT website.

File types and whether one file holds every skill: TO CONFIRM

Get the NT App

for jobs on your own files

Windows
Download, double-click the installer, press Install.

Mac
Download, open the file, drag NT to Applications.

Linux
AppImage, .deb, .rpm, or Flatpak from the NT website.

Omarchy
Press Super + Space, pick **Install**, then **AUR**, and type `nt-app`. Or use the AppImage.

iPhone and iPad
Open the NT website in Safari. Tap **Share**, then **Add to Home Screen**.

Android
Open the NT website in Chrome and tap **Install**.

The package name `nt-app` and the store listings are planned, not yet created. Each step is checked against platform docs on page 12 and page 8.

For email and calendar tools, connect once

Claude: click **+** in the message box, then **Connectors**. **ChatGPT:** add the Gmail or Google Drive plugin. **Grok:** go to **grok.com/connectors** and choose **New Connector**. NT reads first and asks before any change.

YOU Find me ways to save money. Here's my bank file.

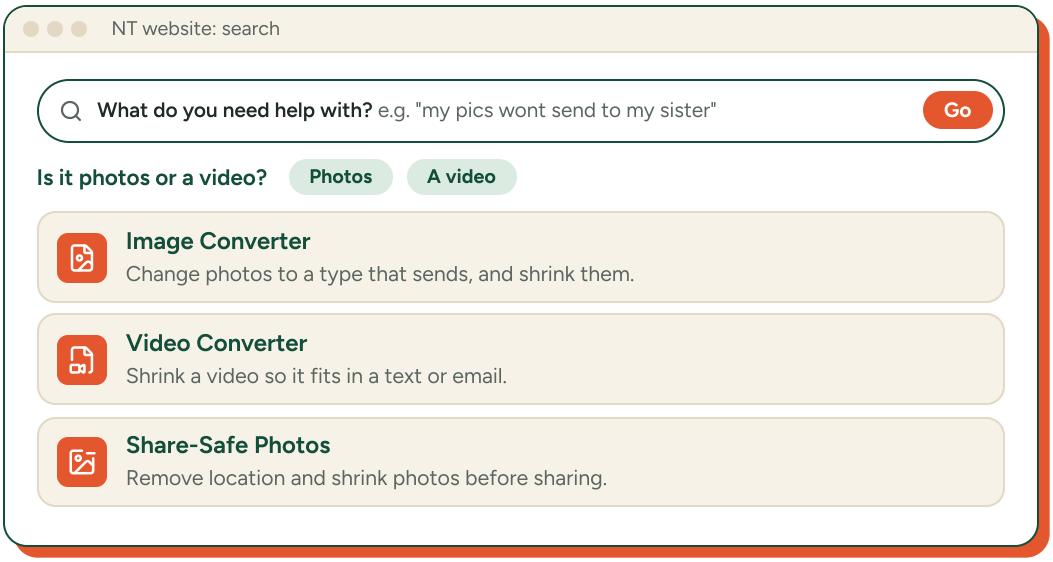

NT I found 6 things. The biggest is a gym you stopped using: $49 a month.

Agents and coding tools (Grok Bot, Claude Code, Codex, Cursor, pi, and more) are on page 14.

FINDING THE RIGHT TOOL EVERYWHERE, ON THE DEVICE

Say it your way. Land on the right tool.

With 76 tools, finding the right one is its own feature. It works the same on the website, in the NT App, in your AI, and in the nt command.

Wireframe, example content only. Misspelled, vague words still land on the right tools, and NT asks one question when it isn't sure.

Where it shows up

- **Website and NT App:** the big box at the top of every screen.
- **The nt command:** `nt search "my downloads are a mess" --json`.
- **Agents:** a `search_tools` tool on the local MCP server.
- **Chat apps:** a small "NT start" skill that lists every tool in plain words, and skill descriptions written and tested so the right one wakes up.

How it works, on the device

1. Every tool ships about 30 plain-words example requests, with common misspellings and Spanish.
2. Fast word matching finds likely tools.
3. A small on-device meaning model (all-MiniLM-L6-v2 through Transformers.js, about 22 MB) ranks them by meaning. It downloads once and is cached.
4. If the top two are close, NT asks one short question instead of guessing.

Built for tiny models

An agent never has to choose from 76 tools. `nt search` returns the top 5 with one line each, and a small model picks a number from that short list. Choosing from a list is something small models do well.

Test set and pass bar

- 1,500 made-up requests written the way people really type: short, vague, misspelled, and some in Spanish. One in five has no matching tool.
- Pass bar: the right tool first 90% of the time, in the top 3 98% of the time, and "no tool fits" caught 90% of the time.
- In each chat app, 200 requests check that the right NT skill starts.
- Fast: results in under 100 ms on a 5-year-old phone once loaded.

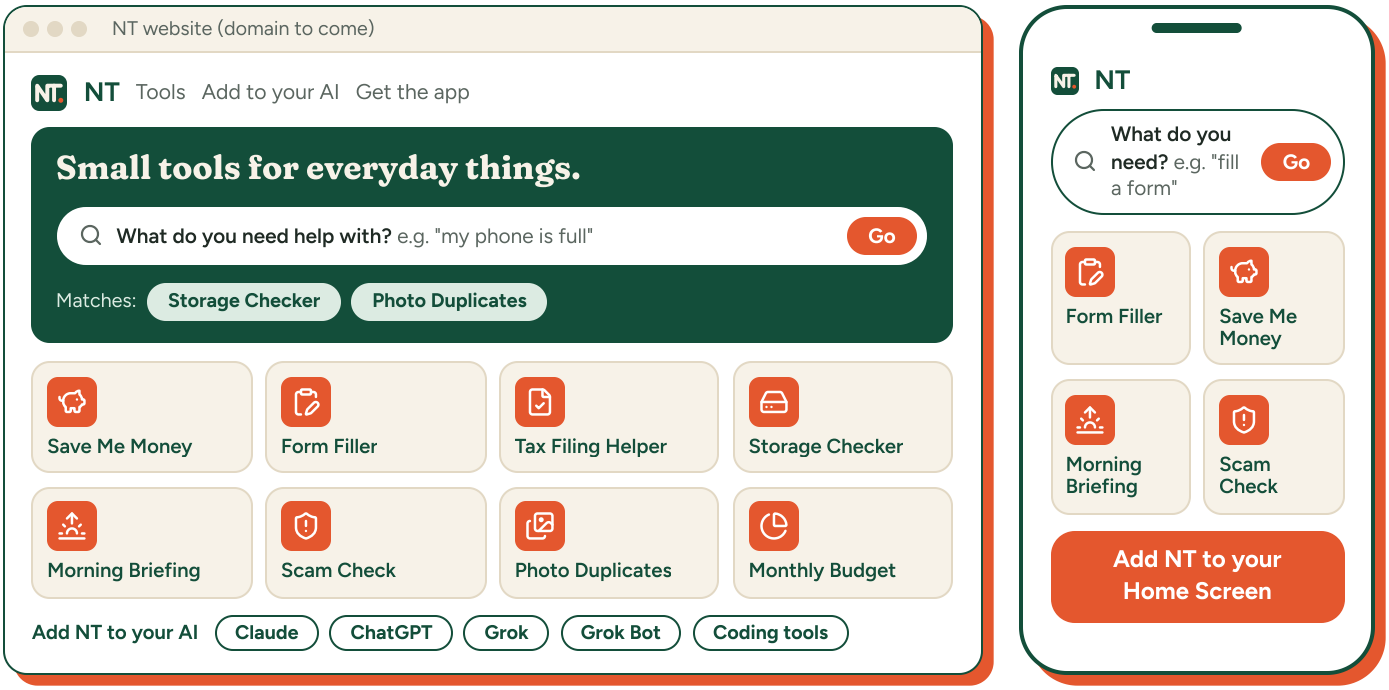

Privacy

Search runs on the device. What a person types is never sent to us.

NT WEBSITE DOMAIN TO COME

One box: say what you need

The homepage is a single box. A person types a chore in plain words and lands on the right tool, ready to use.

Wireframes, example content only. Left: desktop. Right: phone.

The prompt box

"My phone is full", "I got a scary letter", "help me save money". The box matches the words to the right tool or skill and opens it. Matching runs in the browser using a small on-page index of every tool's plain-words examples, so typed words are not sent anywhere. If nothing matches well, it shows the three closest tools and a "describe it in your AI" button.

Every tool, usable right on the site

Tools that work on files you pick (forms, PDFs, bank files, photos to share) run in the browser, and the file never leaves the device. Results download as normal files. Tools that need your whole computer (storage, folders, duplicates) show a "Get the NT App" step instead of a weaker web version.

The page for each tool

1. What it does, in one line, and a 20-second clip.
2. **Use it here** (web version), or **Open in the NT App**.
3. **Add to** buttons: Claude, ChatGPT, Grok, Grok Bot, and coding tools (copy one line).
4. "NT will never" and the tool's test pass bar.
5. Version, changelog, and known limits.

dbaney.com

NT becomes the first featured project on dbaney.com, with a card that links to the NT website. Plan only; no changes to dbaney.com now.

On phones, no app store

People add the NT website to their Home Screen. It opens like an app, and we skip app store review.

iPhone and iPad

- The person taps **Share**, then **Add to Home Screen**. There is no install button or install prompt on iOS, so the site shows a 3-picture guide.
- On iOS and iPadOS 26, every site added to the Home Screen opens as a web app by default (an "Open as Web App" switch is on).
- On iOS 16.4 to 18, the site needs a web app manifest with `display: standalone` to open as a web app. NT ships one anyway.
- Since iOS 16.4, Home Screen web apps can get push notifications (for weather alerts and bill reminders), but only after the person taps a button to allow them.

Android

- Chrome offers **Install** when the site has a manifest with a name, 192 px and 512 px icons, a start URL, and a display mode, over HTTPS.
- On phones with Google Play services, Chrome installs it as a WebAPK: a real launcher icon that appears in Settings, Apps. Other browsers make a shortcut instead.

Limits we design around

- Phone browsers can't organize your whole photo library or disk. Phone tools work on files you pick, and storage help uses a screenshot.
- Browser storage can be cleared, so My Info on the web offers an encrypted backup file.
- Apple's configuration-profile web clips: skipped. Installing a profile takes extra steps in Settings and asks the person to trust a profile, which would worry the people NT is for.

The "Add to" buttons, honestly

Claude	Downloads the NT plugin file, then shows the two clicks from page 5. A true one-click link: TO CONFIRM
ChatGPT	Opens NT's listing in Plugins once OpenAI approves it: TO CONFIRM
Grok	Downloads the skill file and shows **New Skill**, **Upload a file**.
Grok Bot	Opens the NT plugin listing: TO CONFIRM
Coding tools	A copy button with the one line for each tool from page 14.

For builders

- One web UI codebase serves the website, the installable web app, and the NT App window.
- Static site on a static host. No server ever stores a person's files or My Info; browser tools use WebAssembly and pdf-lib.
- Web app manifest, icons from the NT brand, an offline page, and a service worker for push.
- No analytics by default. Only counts that can't identify a person, and only if we add them later with a public note.
- Every tool page is built from the same source as its skill, so the site, skills, and app never disagree.

Sources: webkit.org (Web Push for Web Apps on iOS and iPadOS), WebKit's iOS 26 web apps note, web.dev (install criteria; installation and WebAPKs).

WHAT RUNS WHERE AND WHAT IT COSTS US

Free to use, and free to run

Free server-side converting would cost a lot, and it would mean holding people's files. So every web tool runs on the person's own device.

Tools	WHERE THE WORK HAPPENS	WHAT IT COSTS NT
Converters	The person's browser (WebAssembly, WebCodecs) or the NT App	Hosting the code files. Each one downloads once, only when used, then is cached.
Forms, PDFs, bank files, budgets	The browser, the NT App, or the person's own AI app	Nothing beyond static hosting.
Files, photos, storage	The NT App only	Nothing beyond hosting the app download.
Weather and alerts	The device asks api.weather.gov directly (the API allows this from any site)	Nothing. Free public data.
News	The person's AI app search, or the NT App reading feeds	Nothing. Most news feeds block reading from other websites, and we will not run a relay server.
Calorie Counter	A bundled USDA FoodData Central download	Nothing. No API key in the browser.
Form Finder	A list of official forms rebuilt by a scheduled job; final check on the device	A small scheduled job. GitHub Actions is free for public repos: to confirm.
AI and tool search	The person's own AI app or local model. Website search runs on the device.	Nothing. NT never pays for AI.

The rule for every new tool

1. No server ever handles a person's files or My Info.
2. No hosted AI. The person's own AI app or a local model does the talking.
3. Static hosting only. If a tool would need a server, it moves to the NT App or the person's AI.
4. Every tool page lists where it runs and its cost line.

Browser limits we design around

- ffmpeg.wasm caps input files at 2 GB, and users report iPhone Safari crashing on 400 to 800 MB videos. NT caps phone video at about 300 MB and offers the NT App above that.
- WebCodecs: full support in Safari 26 and later, Chrome and Edge 94 and later, and Firefox 130 and later on desktop. Safari 16.4 to 18.7 had video only; Firefox for Android has none. NT checks support before it starts.
- wasm-vips needs cross-origin isolation headers on the site.
- Download sizes: pandoc.wasm about 16 MB compressed; the search model about 22 MB. Loaded only when needed.

Licenses, honestly

- **FFmpeg** is LGPL 2.1 or later, but GPL parts like x264 make a whole build GPL. The standard `@ffmpeg/core` package is GPL-2.0-or-later. NT builds its own FFmpeg without `--enable-gpl` or `--enable-nonfree`, follows FFmpeg's compliance checklist, and uses the browser's or computer's own H.264 encoder instead of x264.
- **Mediabunny** is MPL-2.0: free to use; changes to its own files must be shared.
- **wasm-vips** is MIT, but libvips and some parts are LGPLv3. NT publishes their source and build steps.
- **pandoc** is GPL-2.0-or-later. It ships as a separate module, with its source offered.
- NT's own code: MIT is the plan. A lawyer reviews the mix before launch: TO CONFIRM

What NT does pay for

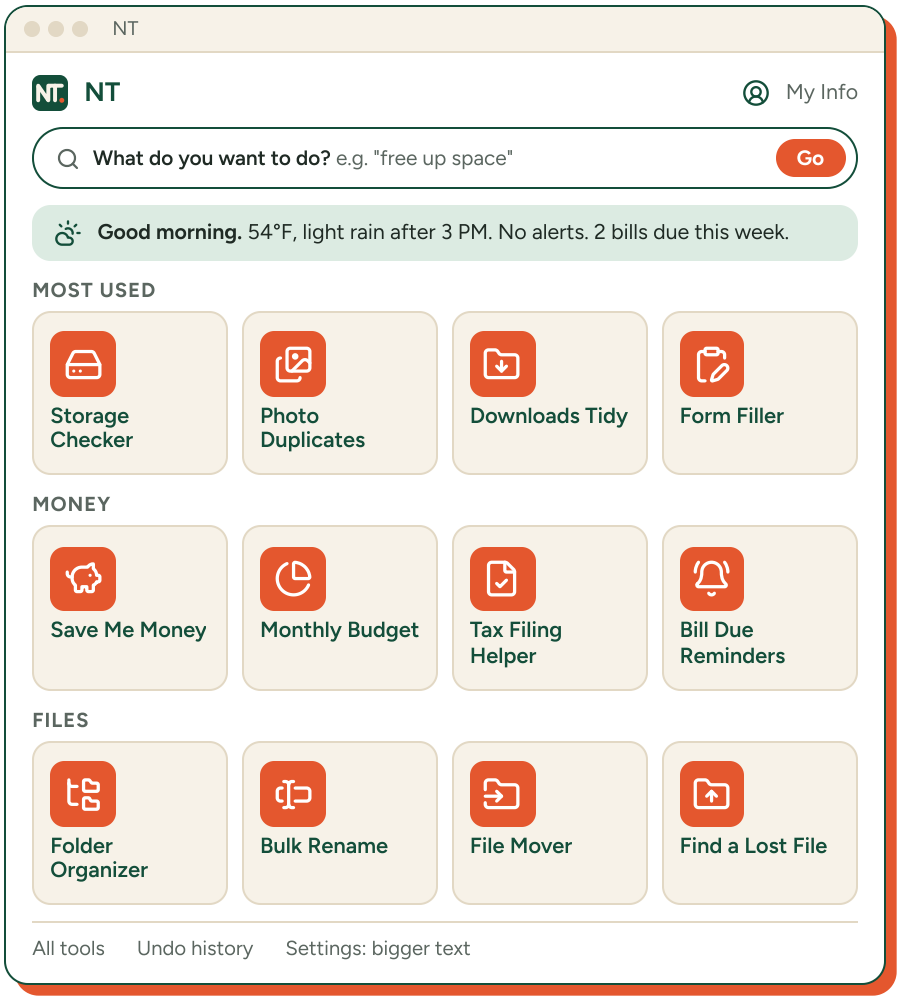

The domain (Donovan is registering it), static hosting (free plans exist; limits TO CONFIRM), code signing for Windows, and Apple's developer program for Mac notarization (costs TO CONFIRM).

Sources: ffmpeg.org/legal, ffmpeg.wasm FAQ and issues 107 and 623, npm @ffmpeg/core, mediabunny.dev, caniuse.com/webcodecs, wasm-vips README and notices, pandoc 3.9 release notes, Hugging Face Xenova/all-MiniLM-L6-v2, a check of api.weather.gov headers on November 4, 2026.

NT APP WINDOWS, MAC, LINUX

Big buttons for everyday chores

Chat apps can't touch the files on your computer. The NT App can, safely, with a preview and undo for everything.

Wireframe, example content only.

The home screen

- One question at the top: "What do you want to do?" It works like the website's box.
- Big tool tiles with plain names. No menus to learn.
- The morning line at the top: weather, alerts, and bills due.
- My Info and Undo history always one click away.

Made to be easy

- Every chore takes one screen and one big button.
- Files you drop in are only looked at until you press the button.
- Works with no account and no internet, except weather, news, forms, and updates.
- Same look on Windows, Mac, Linux, and the website.

The first time you open it

1. **Pick your text size.** Big, bigger, or biggest. You can change it any time.
2. **Fill My Info**, or skip. Your town makes the morning weather work.
3. **Try one tool** on a sample folder NT makes, so you can see a preview and Undo before touching your own files.

When something goes wrong

Every error says what happened, that nothing was lost, and the one thing to do next. For example: "Your drive was unplugged. Nothing was lost. Plug it back in and press Continue."

Tools that live in the app

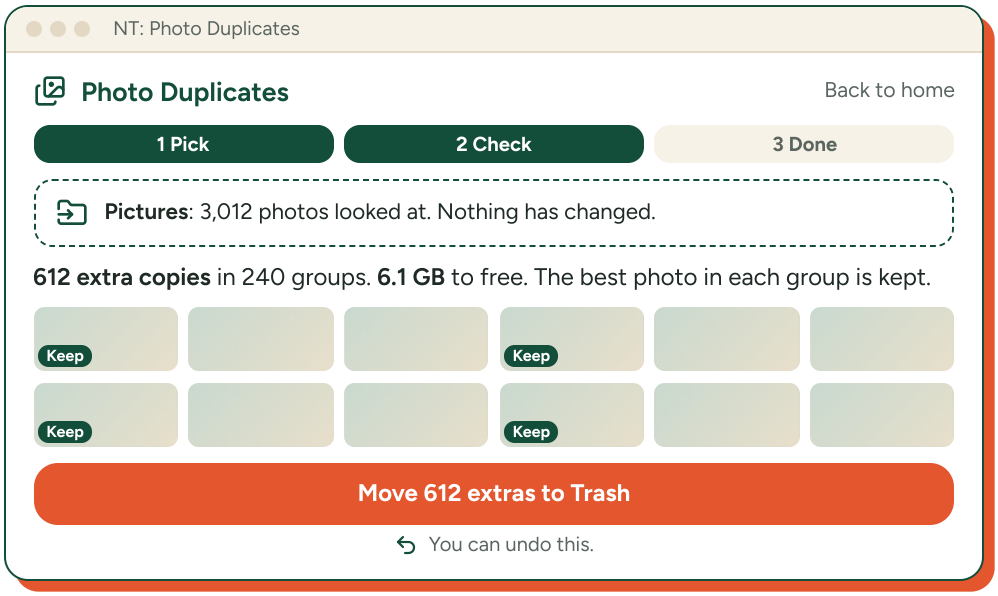

- Storage Checker
- Photo Duplicates
- Large File Finder
- Downloads Tidy
- Desktop Cleanup
- Screenshot Cleanup
- Folder Organizer
- File Mover
- Bulk Rename
- Old Phone Import
- Find a Lost File

Every other NT tool also opens in the app, using the same screens as the website.

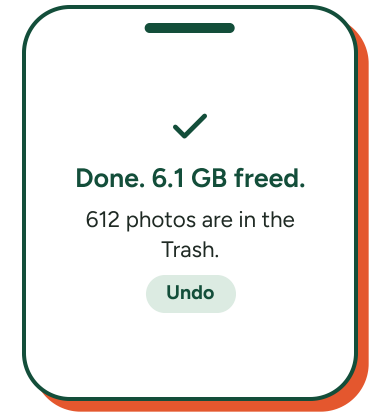

NT APP ONE SCREEN PER TASK

Pick, check, one button, undo

Every file tool follows the same three steps, so learning one means you know them all.

Wireframe, example content only.

After the button: a plain result and Undo.

The flow, every time

1. **Pick.** Drop files or a folder, or press the suggested folder. NT only looks.
2. **Check.** One summary sentence with the number and the size, then a visual preview. Tap anything to change it.
3. **One big button** with a plain verb: "Move 612 extras to Trash".
4. **Done, with Undo.** Undo lasts until you empty the Trash, and the history keeps every change.

Easy for everyone

- **Large text** by default, and a bigger-text switch on every screen. Follows the computer's text size.
- **Plain words.** No jargon like "hash" or "directory". Grade 6 reading level.
- **Keyboard:** every action has a visible focus ring; Enter presses the big button, Ctrl or Cmd + Z undoes.
- **Screen readers:** real buttons and labels, tested with NVDA, VoiceOver, and Orca.
- **Color is never the only signal.** Text contrast at least 4.5:1, touch targets at least 44 px.

Stack, packages, updates

One engine, three ways in: the app window, the nt command, and a local MCP server.

Recommended stack

- **Tauri 2** for the app shell. Stable release since 2.0, builds for Windows, macOS, Linux, iOS, and Android from one codebase, and uses the system web view, so installers stay small.
- **Rust engine** (`nt-core`) shared by the app, the `nt` command, and the MCP server. It owns every file move, the undo journal, and moving to Trash on each OS.
- **Same web UI** as the website, so one design ships everywhere.
- **Phones:** the installable website first (page 8). Tauri's iOS and Android builds later, only if a store app adds real value.

Packages per OS

Windows	Installer from Tauri's Windows bundler, code signed. winget listing: TO CONFIRM
macOS	DMG, signed and notarized (Apple requires notarization outside the App Store).
Linux	AppImage, .deb, .rpm, and Flatpak. Tauri documents all four, plus Snap and AUR.
Omarchy	An AUR package, installed from the Omarchy menu (Super + Space, Install, AUR) or `omarchy pkg aur install`. Omarchy's own defaults avoid the AUR, so the AppImage is the backup path. Test on Hyprland (Wayland).

Updates and signing

- Tauri's updater plugin checks HTTPS endpoints and installs signed updates. Update signing can't be turned off. The private key stays in CI secrets; losing it would strand existing installs.
- AppImage and RPM signing use GPG keys. Note: AppImage signatures are not checked on launch, so we publish the key ID on the website.
- .deb, .rpm, AUR, and Flatpak update through the system's package tools.
- Windows and macOS signing certificates are a paid line item. Cost and account owner: TO CONFIRM

Local only by default

- No account, no telemetry. Network use is listed in Settings: weather, news, forms, updates.
- File tools never use a permanent delete. The engine uses the OS Trash or Recycle Bin and writes an undo journal first.
- System and app folders are blocked by the engine, not just hidden in the UI.

Agents and the engine

`nt <tool> --preview | --apply | --undo --json` for coding tools and Grok Bot. `nt mcp` serves the same tools to MCP clients, and a `.mcpb` bundle installs it in Claude's desktop app. Every apply needs a fresh approval.

Build order

1. Engine and `nt` command with Downloads Tidy and Storage Checker, undo journal, and Trash on all OSes.
2. Tauri shell with the home screen and the task-screen template.
3. `nt mcp` and the `.mcpb` bundle.
4. Signing, updater keys, and the release pipeline.
5. Packages per OS, tested on Windows 11, macOS, Ubuntu, Fedora, and Omarchy.

Sources: v2.tauri.app (Distribute, AppImage, Linux code signing, RPM, Updater, Tauri 2.0 release), omarchy.org manual (Other Packages), omarchylinux.org command reference, claude.com docs (MCPB).

One command for every tool

The NT App, the local MCP server, and the nt command share one engine. Any agent that can run a command can use every NT tool, with the same preview and undo.

Terminal (staged example, made-up files)

```
$ nt search "my downloads folder is a mess" --json
{"results": [
  {"tool": "downloads-tidy",   "score": 0.94, "says": "Sort Downloads and clear old installers"},
  {"tool": "folder-organizer", "score": 0.71},
  {"tool": "large-files",      "score": 0.42}]}

$ nt run downloads-tidy ~/Downloads --json
{"plan": "p_7f3a", "moves": 640, "to_trash": 38, "frees": "4.2 GB",
 "needs_approval": true}

$ nt apply p_7f3a
Move 640 files into 5 folders and put 38 old installers in the Trash? [y/N] y
Done. Undo any time with: nt undo r_7f3a
```

Commands

`nt search "words"`	Find the right tool. Top 5 with one plain line each.
`nt list [--group money]`	Every tool, or one group.
`nt info <tool>`	What it does, what it needs, and its never list.
`nt run <tool> [files]`	Makes a preview and a plan ID. Changes nothing.
`nt apply <plan-id>`	Does the plan, after a yes in the terminal, the NT App, or the agent's approval card.
`nt undo [<run-id>]`	Puts everything back. `nt history` lists past runs.
`nt myinfo request <fields>`	Asks the person to share named My Info fields for one task.
`nt mcp`	Starts the local MCP server with the same tools.
`nt doctor, nt update`	Checks the setup, and updates NT.

Flags everywhere

`--json` for short, stable output; `--dry-run` (same as a plain run, which never changes anything); `--lang es`; `--quiet`. Exit codes: 0 done, 2 needs approval, 3 nothing to do, 4 blocked as unsafe, 5 problem with the input.

Why plan IDs

An agent can't skip the preview: `apply` only takes a plan ID that `run` made. If any file changed since the preview, `apply` refuses and asks for a new preview.

How it fits together

- **Skills** say: if `nt` is installed, use it; if not, do the steps yourself.
- **The MCP server** (`nt mcp`) offers the same commands as tools.
- **Grok Bot** runs `nt` on your computer with "Execution on this computer" turned on, one approved command at a time.
- **Tiny models** do well here: short JSON, a top-5 list to pick from, and fixed exit codes.
- **Install:** it comes with the NT App, which offers to add `nt` to the system path. Standalone Homebrew, winget, and AUR packages: TO CONFIRM

NT inside your agents

The same skills work in agent apps and coding tools. With the NT App installed, agents can also run the file tools on your computer, with your OK each time.

Grok Bot

Target: the NT Grok Bot plugin. Grok Bot's docs say it supports the same MCP servers, plugins, and skills as Cursor, and lists plugins and packaged skills under **Connect apps** in the sidebar. Plan: ship NT in the Cursor plugin format so one package serves both. How NT gets listed there: TO CONFIRM

Grok Bot works from a cloud computer. To touch files on your own computer, you turn on **Execution on this computer** in Grok Bot settings, and each command needs your approval (the default). NT's file tools then run through the NT App's `nt` command, which previews first. Whether Grok Bot can attach a local MCP server: TO CONFIRM

Claude desktop app

The NT App ships a one-click desktop extension (`.mcpb`) for its local MCP server. Double-click it, or use **Settings**, **Extensions**, **Advanced settings**, **Install Extension**.

ChatGPT and Grok web

Skills and plugins as on page 5. Web apps can't reach your computer. Grok's custom connectors need a public URL, so local file tools stay in the NT App. ChatGPT desktop with a local server: TO CONFIRM

Coding tools and agent harnesses

Replace `OWNER` with the GitHub account that publishes NT (not created yet).

Claude Code	`/plugin marketplace add OWNER/normie-tools` then `/plugin install nt@normie-tools`
Codex	`codex plugin marketplace add OWNER/normie-tools` then open `/plugins` and install NT
Cursor	**Customize**, find NT, **Install** (after Cursor's review). Local test: `~/.cursor/plugins/local/nt`
pi	`pi install git:github.com/OWNER/normie-tools`
Hermes Agent	`hermes skills tap add OWNER/normie-tools`
OpenCode, Goose, others	Copy the `skills/` folders into `~/.agents/skills/` (OpenCode also reads `~/.claude/skills/`)
Any MCP client	With the NT App installed: `nt mcp` starts the local server (stdio). Tools: `preview`, `apply`, `undo`, `myinfo_request`

How an agent drives a file tool

Preview. The agent calls `nt tidy downloads --preview`. Nothing moves.

Show. It shows you the plan in plain words.

You approve. In the NT App window or the agent's approval card.

Apply. The engine moves files and writes the undo journal.

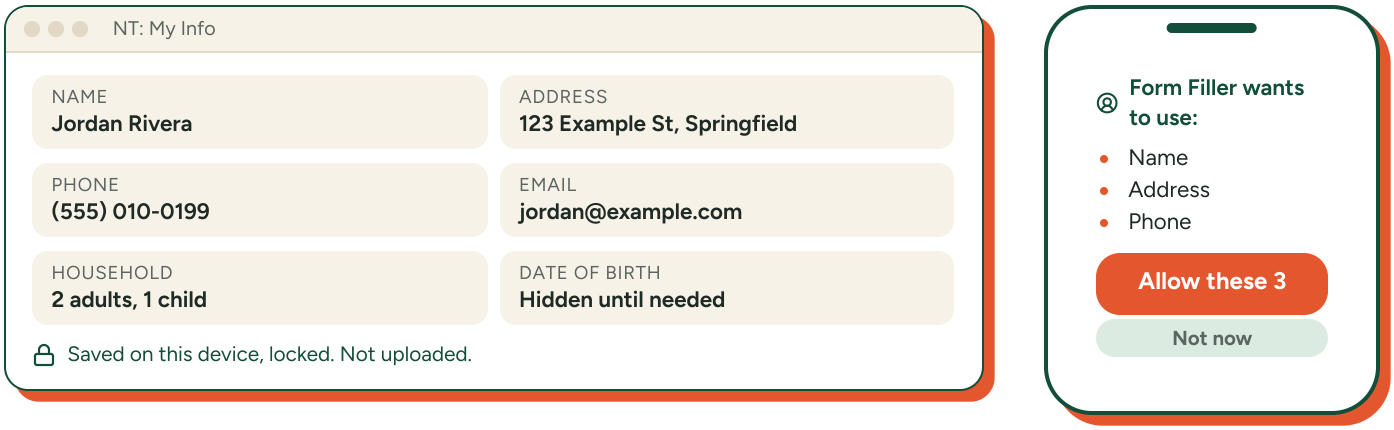

Undo stays one tap away in the NT App.

Tiny local models only pick the command and read short JSON back; the engine does the work. My Info is shared with an agent only through `myinfo_request`, which shows you exactly which fields it asked for.

MY INFO TYPE IT ONCE

Your details, ready when you need them

A private card with your name, address, and the other things forms keep asking for. Every tool can use it, only with your OK.

Each tool asks for only the fields it needs.

Wireframe, example content only.

What it holds

Name, address and past addresses, phone, emails, date of birth, household members and their birthdays, employer, school, doctor and pharmacy, insurance member IDs (last 4 digits by default), emergency contacts, and your town for weather.

Where tools use it

Form Filler, Form Finder, Tax Filing Helper, Invoice Maker, Letter Kit, Address Labels, Resume Formatter, Emergency Binder, Moving Checklist, Account Recovery Kit, and the morning weather.

What it never keeps

Passwords, full Social Security numbers, bank or card numbers, or ID photos. When a form needs one of those, you type it into that form yourself.

How it stays private

- Stored only on your device, encrypted. In the NT App the key lives in the system keychain (Keychain on Mac, Credential Manager on Windows, Secret Service on Linux).
- On the website, it is encrypted in the browser with a passcode you choose, and you can save an encrypted backup file.
- Chat apps and agents get only the fields you allow, for one task. You see the list first.
- Never uploaded or synced unless you share it yourself. Delete it all with one button.

For builders

One schema (`myinfo.json`, versioned) shared by skills, the app, and the site. Agents call `myinfo_request(fields, reason)`; the engine shows the request and returns only approved fields. In chat apps, the person taps "Copy for this form" and pastes just those fields. Test: every request shows the right field list; nothing outside it is ever returned.

One source, every app

Each skill is written once in the open Agent Skills format. A build step packages it for every target, and the same source makes the website pages.

Repo layout

```
normie-tools/
  skills/<slug>/SKILL.md      one folder per skill
  skills/<slug>/scripts/      helper scripts
  skills/<slug>/examples/     made-up test files
  skills/<slug>/evals/        test set + pass bar
  engine/                     nt-core + converters
  app/                        Tauri 2 shell
  cli/                        the nt command
  router/                     tool search + tests
  web/                        site + web app
  plugin.json                 Agent Plugins manifest
  .claude-plugin/             plugin + marketplace
  .cursor-plugin/             Cursor and Grok Bot
  .agents/plugins/            Codex marketplace
  package.json                pi package settings
  CHANGELOG.md                plain-words releases
```

Targets

CLAUDE	Plugin zip with `.claude-plugin/plugin.json`, plus one zip per skill for Upload a skill.
CHATGPT	Root `plugin.json` (Agent Plugins schema) with `skills/`. Directory review.
GROK	One file per skill. Formats: to confirm.
GROK BOT	The Cursor-format plugin. Listing route: to confirm.
CLAUDE CODE	`.claude-plugin/marketplace.json`; check with `claude plugin validate`.
CODEX	Root `plugin.json` and `.agents/plugins/marketplace.json`.
CURSOR	`.cursor-plugin/plugin.json` (only `name` required).
PI	`"pi": {"skills": ["./skills"]}` and the `pi-package` keyword.
OTHERS	Folders in `~/.agents/skills/`. Hermes taps the repo.

Works everywhere, better with tools

Each `SKILL.md` says what the person gives, the steps, and the file to hand back. Each step reads: "If you can run scripts, run `scripts/x.py` (or `nt`). If not, do this step yourself." Chat apps use attached files and connections. Coding tools and Grok Bot also run the scripts and, with the NT App, the engine.

Built for tiny models

- `SKILL.md` under 150 lines; tables in `references/`.
- Scripts and the engine do the exact work and return short JSON.
- `--preview` and `--json` everywhere; offline except live-data tools.
- Two worked examples per skill to copy.

How we build and test

1. A brief per skill. `claude -p` writes the skill, scripts, and evals in a worktree, tests first. `codex exec` reviews the diff.
2. CI checks every `SKILL.md` against the Agent Skills rules, runs every eval, and blocks a release under its pass bar.
3. The cross-app matrix from page 4 runs before each release, with recordings.
4. Demos use demo accounts and made-up files. Frames get an OCR pass for names, emails, and paths before posting.
5. Launch: one post with the top 5 reel and the website, for the quote tweet.

Install steps checked November 4, 2026 against Claude Help Center and claude.com docs, OpenAI ChatGPT and developer docs, x.ai and docs.x.ai, Grok Bot docs and x.ai's Grok Bot guide, Claude Code and Cursor docs, the pi README, and the OpenCode, Goose, and Hermes docs. Full list in PLATFORM-SOURCES.md. "To confirm" marks steps not verified.

NT 01 BUDGET AND SAVING

Save Me Money

Find real ways to save, ranked by how many dollars each one saves you, using only your own bank file and email.

EFFORT M
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file or use your email | On the NT website | Ship first, #1

Who it helps

Anyone who feels money slipping away and wants a plain list of what to fix first.

Get ready

1. Log in to your bank's website on a computer.
2. Open the account, then find Download or Export.
3. Pick CSV and the dates you want. Save the file.
4. Optional: connect your email so NT can read receipts and bills too.

What you get

A ranked savings list (PDF and XLSX). Every dollar figure links back to the rows it came from.

What you say

YOU Here's a year of my bank file. Find me ways to save money, biggest first.

What happens

1. NT finds repeat charges, fees, price jumps, and duplicate subscriptions in your file and email.
2. It ranks each one by what you actually paid this year, like "Late fees: $87 in 2026".
3. You pick what to fix. NT makes a cancel list, call scripts, and reminders for each one.

NT WILL NEVER

- Never cancels, calls, or pays anything for you.
- Never invents a number. If it can't measure a saving from your data, it says so.

For builders

normie-tools/skills/save-me-money

SKILL Runs subscription, fee, price-change, and duplicate detectors over the CSV and (optional) read-only mail receipts, then ranks by measured annual spend. Each item gets a next step that hands off to Subscription Finder, Bill Negotiation Prep, or Cheaper Plan Finder.

ENGINE savings.py runs the detectors and writes every estimate with the row IDs behind it, so a small model only explains the list.

TEST Made-up year of bank data with planted savings (3 subscriptions, 2 fee types, a price jump). Pass bar: all planted items found, every dollar total exact to the cent.

DEMO Staged, made-up files, demo account. Staged: a fake year of charges becomes a top-5 list worth $1,140 in that fake data.

RISK False hope. Figures come only from past charges; future savings are labeled as estimates with the math shown.

NT
Launch post draft

Gave my AI a year of my own bank file. It found what I was wasting, biggest first, with receipts.

normie-tools/skills/save-me-money

NT 02 BUDGET AND SAVING

Receipt to Spreadsheet

Snap your receipts and get one spreadsheet with date, store, total, and category.

EFFORT S
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Freelancers, families on a budget, and anyone who needs receipts for a refund from work.

Get ready

1. Take a clear photo of each receipt on a dark table.
2. Attach the photos to one message.

What you get

- A spreadsheet (XLSX or CSV) with one row per receipt.

What you say

YOU Add these receipts to a spreadsheet and tell me the total.

What happens

1. You attach the photos.
2. NT reads each receipt and fills in a row. It flags any number it can't read.
3. You fix the flagged ones and download the spreadsheet.

NT WILL NEVER

- Never saves card numbers.
- Never fixes a total without telling you.

For builders

normie-tools/skills/receipt-to-sheet

SKILL Reads receipt images with the app's own vision, writes rows, checks that subtotal plus tax equals total, and flags mismatches.

ENGINE receipts.py runs local OCR (Tesseract) for coding tools and tiny local models that can't read images.

TEST 30 fake receipts photographed in bad light. Measure field accuracy and publish the command.

DEMO Staged, made-up files, demo account. Three crumpled fake receipts become three rows and a total.

RISK Misreads. Totals that don't add up are flagged, never silently changed.

NT
Launch post draft

Photo of a receipt in, spreadsheet row out. Works in the AI app you already use.

normie-tools/skills/receipt-to-sheet

NT 03 BUDGET AND SAVING

Subscription Finder

Find every repeat charge in your bank download and get a list of how to cancel each one.

EFFORT S
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone who thinks they pay for apps and trials they forgot about.

Get ready

1. Log in to your bank's website on a computer.
2. Open the account, then find Download or Export.
3. Pick CSV and the dates you want. Save the file.

What you get

A spreadsheet of repeat charges with yearly cost, and a cancel checklist.

What you say

YOU Here's my bank file for the last six months. What am I paying for every month?

What happens

1. You attach the file.
2. NT finds charges that repeat and adds up what each costs per year.
3. You pick what to cancel. NT gives you the steps from each company's own help page.

NT WILL NEVER

- Never logs in or cancels for you.
- Never contacts any company.

For builders

normie-tools/skills/subscription-finder

SKILL Groups merchants, finds repeats by amount and timing, totals yearly cost, flags price increases, and looks up official cancel pages when the app can browse.

ENGINE recurring.py does the matching for coding tools and small models.

TEST Fake statements with planted subscriptions and a known answer key.

DEMO Staged, made-up files, demo account. Six months of fake charges become a list of 9 subscriptions and a cancel checklist.

RISK False hits like rent. Shown as repeat charges and you decide.

NT
Launch post draft

My AI found every subscription in my bank download and wrote me a cancel list.

normie-tools/skills/subscription-finder

NT 04 BUDGET AND SAVING

Monthly Budget

See where your money went each month, set simple limits, and know what's left to spend.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

People who want a budget without a budgeting app that asks for their bank password.

Get ready

1. Log in to your bank's website on a computer.
2. Open the account, then find Download or Export.
3. Pick CSV and the dates you want. Save the file.

What you get

A spreadsheet with groups and a one-page PDF summary.

What you say

YOU Here's last month's bank file. Make me a simple budget and tell me what changed.

What happens

1. You attach one or more months.
2. NT puts each charge into a group like food, rent, or gas.
3. You set a limit for each group, and get a one-page budget with what's left to spend this month.

NT WILL NEVER

- Never asks for your bank login.
- Never gives investment advice.

For builders

normie-tools/skills/monthly-budget

SKILL Column mapping, editable group rules, monthly summary with charts, and a short plain readout.

ENGINE budget.py builds the same summary offline.

TEST Fake exports in several layouts. Totals must match the input to the cent.

DEMO Staged, made-up files, demo account. A month of fake charges becomes one page with bars.

RISK Wrong groups. Rules are shown and you can rename them.

NT
Launch post draft

No budget app, no bank login. My AI made a simple budget from one download.

normie-tools/skills/monthly-budget

NT 05 BUDGET AND SAVING

Bill Due Reminders

Turn your bills into calendar reminders a few days before each one is due.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file or use your email | On the NT website

Who it helps

Anyone who has paid a late fee because a due date slipped by.

Get ready

1. Take photos of your bills or save the PDFs.
2. Or let NT look through your email, if you connected it.

What you get

- A calendar file (.ics) and a bill list spreadsheet.

What you say

YOU Make reminders for all my bills this month, three days before each one is due.

What happens

1. You attach bills, or say "check my email".
2. NT finds the amount and due date on each one and shows you the list.
3. You download one calendar file and open it. The reminders appear in your calendar.

NT WILL NEVER

- Never pays a bill.
- Never adds anything to your calendar without you opening the file.

For builders

normie-tools/skills/bill-reminders

SKILL Extracts biller, amount, and due date, confirms the list, writes an .ics with alarms. With a mail connector, searches recent mail read-only.

ENGINE ics_writer.py shared by every calendar skill.

TEST Fake bills and fake mail threads with known due dates.

DEMO Staged, made-up files, demo account. Five fake bills become five calendar reminders.

RISK Wrong dates. The list is shown before the file is made.

NT
Launch post draft

Never miss a due date. Your AI turns your bills into reminders.

normie-tools/skills/bill-reminders

NT 06 BUDGET AND SAVING

Warranty and Returns Keeper

Keep track of return windows and warranties, with reminders before they end.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone who has missed a return window.

Get ready

1. Take a photo of the receipt or forward the order email to yourself and save it.

What you get

- A calendar file (.ics) and a purchases list spreadsheet you keep.

What you say

YOU I just bought a vacuum. Here's the receipt. Remind me before I can't return it.

What happens

1. You attach the receipt.
2. NT finds the store, date, and price, and asks how long the return window is if it isn't printed.
3. You download a calendar reminder and an updated list of your purchases.

NT WILL NEVER

- Never contacts the store.

For builders

normie-tools/skills/warranty-keeper

SKILL Reuses the receipt reader, does date math, writes .ics, appends to a list the user keeps.

ENGINE Shared ics_writer.py.

TEST Date math tests across months and leap years.

DEMO Staged, made-up files, demo account. A receipt becomes a return reminder.

RISK Store rules vary. The user confirms the number of days.

NT
Launch post draft

Never miss a return window again.

normie-tools/skills/warranty-keeper

NT 07 BUDGET AND SAVING

Medical Bill Explainer

Compare a medical bill with your insurance statement and see if the numbers match.

EFFORT M
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone holding a confusing medical bill and an "Explanation of Benefits" from insurance.

Get ready

1. Take photos of the bill and the insurance statement, or download them from the insurance website.

What you get

A one-page comparison PDF and a list of questions to ask.

What you say

YOU Does this hospital bill match what my insurance says I owe?

What happens

1. You attach both papers.
2. NT lines up each service, date, and amount side by side.
3. You get a plain summary and a short list of questions to ask the billing office.

NT WILL NEVER

- Never tells you to skip a payment.
- Never gives medical advice.

For builders

normie-tools/skills/medical-bill-explainer

SKILL Matches line items by date and service, flags mismatches and duplicates, quotes every number from the papers.

ENGINE compare.py does the line matching for coding tools.

TEST 15 fake bill and statement pairs with planted mismatches.

DEMO Staged, made-up files, demo account. A fake bill and statement, one mismatch found and quoted.

RISK Wrong conclusions. Every claim quotes the paper, and the user calls the billing office.

NT
Launch post draft

My AI caught a duplicate charge on a medical bill by comparing it with my insurance letter.

normie-tools/skills/medical-bill-explainer

NT 08 BUDGET AND SAVING

Spending Check-in

A 2-minute weekly look at your spending: on track, a little over, or way over, in plain words.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

People who don't want a budget app but want to stop being surprised at month end.

Get ready

1. Log in to your bank's website on a computer.
2. Open the account, then find Download or Export.
3. Pick the last 7 days and save the CSV file.

What you get

A one-page check-in PDF and a calendar reminder (.ics) for the next one.

What you say

YOU Here's this week's spending. Am I on track with my budget?

What happens

1. NT compares this week to the budget you set (or to your usual weeks).
2. It tells you in three lines what's fine and what's high, like "Food out: $64 over".
3. You get one small idea for next week, and a reminder for next week's check-in.

NT WILL NEVER

- Never shames or scolds.
- Never moves money.

For builders

normie-tools/skills/spending-checkin

SKILL Weekly comparison against Monthly Budget targets or a trailing 8-week median. Tone rules in SKILL.md: neutral words, one suggestion max.

ENGINE checkin.py computes week totals by group and the gap to target.

TEST 12 fake weeks with known totals. Pass bar: totals exact, tone check passes on every readout.

DEMO Staged, made-up files, demo account. Staged: a fake week shows two groups over and one tip.

RISK Guilt. Copy is reviewed for kind, neutral wording.

NT
Launch post draft

Two minutes on Sunday. My AI tells me if my week was on track.

normie-tools/skills/spending-checkin

NT 09 BUDGET AND SAVING

Savings Goal Tracker

Pick a goal, like $1,000 for emergencies, and see a simple plan and your progress each month.

EFFORT S
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Anyone saving for something: an emergency fund, a car repair, a trip, a holiday.

Get ready

1. Nothing to download to start. Just say your goal.
2. Each month, attach your savings account CSV to update progress.

What you get

A goal plan PDF, a progress spreadsheet, and payday reminders (.ics).

What you say

YOU Help me save $1,000 for emergencies by June.

What happens

1. NT works out what that takes each week and each payday.
2. It suggests where the money could come from, using your own spending if you share it.
3. Each month you send an update and get a progress bar and a plain note.

NT WILL NEVER

- Never moves money or opens accounts.
- Never gives investment advice.

For builders

normie-tools/skills/savings-goals

SKILL Goal math (amount, date, pay frequency), optional source suggestions from Monthly Budget groups, monthly progress update from a savings CSV.

ENGINE goals.py does all date and money math, including uneven paydays.

TEST Goal cases with odd dates and pay schedules. Pass bar: every weekly amount exact.

DEMO Staged, made-up files, demo account. Staged: a $1,000 goal turns into $38 a week with a progress bar.

RISK Unrealistic plans. If the goal needs more than spare income, NT says so and offers a later date.

NT
Launch post draft

My AI turned "I should save" into $38 a week and a reminder on payday.

normie-tools/skills/savings-goals

NT 10 BUDGET AND SAVING

Debt Payoff Planner

List your debts and see a payoff date and a month-by-month plan you can stick to.

EFFORT S
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

People juggling credit cards or loans who want to know when they'll be done.

Get ready

1. Find each debt's balance, interest rate, and minimum payment on your statement or the lender's app.

What you get

- A payoff plan PDF, a month-by-month spreadsheet, and payment reminders (.ics).

What you say

YOU Here are my three credit cards. Make me a plan to pay them off.

What happens

1. You type or attach the balances, rates, and minimums.
2. NT shows two common methods side by side (smallest balance first, or highest rate first) with the payoff date and total interest for each.
3. You pick one and download the plan with monthly reminders.

NT WILL NEVER

- Never recommends a loan, card, or company.
- Never gives financial advice. It shows the math; you choose.

For builders

normie-tools/skills/debt-payoff

SKILL Amortization for avalanche and snowball, with the person's chosen extra amount, plus a plain note on when to call a nonprofit credit counselor (generic, no names).

ENGINE payoff.py does month-by-month amortization to the cent.

TEST Debt sets with known schedules computed independently. Pass bar: every month's balance exact.

DEMO Staged, made-up files, demo account. Staged: three fake cards become a debt-free date and a chart.

RISK Rate changes. The plan shows its inputs and asks for an update each month.

NT
Launch post draft

Three credit cards, one plan, one date. My AI showed me when I'll be debt free.

normie-tools/skills/debt-payoff

NT 11 BUDGET AND SAVING

Bill Negotiation Prep

Get a short, polite call script and your facts on one page before you call to lower a bill.

EFFORT S
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info

Who it helps

Anyone whose phone, internet, or insurance bill keeps going up.

Get ready

1. Have your latest bill (a photo or PDF is fine).
2. Optional: a screenshot of a competitor's advertised price.

What you get

- A one-page call sheet PDF and a notes template.

What you say

YOU My internet bill went up $20. Help me call and ask for a lower price.

What happens

1. NT reads your bill and lists the facts: how long you've been a customer, what you pay, what changed.
2. It writes a short script with what to say, what to ask for, and what to say if they say no.
3. You make the call. Afterward, NT helps you note what they offered.

NT WILL NEVER

- Never calls for you or pretends to be you.
- Never makes up a competitor price. It only uses one you show it.

For builders

normie-tools/skills/bill-negotiation

SKILL Bill parser, facts block, script with three branches (yes, partial, no), and a polite cancel-or-stay decision line chosen by the person.

ENGINE None needed. Bill fields come from Receipt to Spreadsheet's parser.

TEST Fake bills from 5 made-up providers. Pass bar: facts exact, script contains no invented numbers.

DEMO Staged, made-up files, demo account. Staged: a fake internet bill becomes a one-page call sheet.

RISK Pushy tone. Scripts are polite and short, and say "I'd like to stay if we can fix the price".

NT
Launch post draft

I was nervous to call about my bill. My AI wrote me a one-page script. Took 9 minutes.

normie-tools/skills/bill-negotiation

NT 12 BUDGET AND SAVING

Cheaper Plan Finder

A checklist to see if a cheaper phone, internet, or insurance plan fits you, using what you actually use.

EFFORT S
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Families paying for more data, speed, or coverage than they need.

Get ready

1. Phone: screenshot your data use screen (Settings, then Cellular or Mobile data).
2. Internet or insurance: a photo of your latest bill or policy summary page.

What you get

A one-page checklist PDF with your real usage and the questions to ask.

What you say

YOU Am I paying for too much phone plan? Here's my bill and my data use.

What happens

1. NT reads what you pay and what you use, like "you used 4 GB a month, your plan has unlimited".
2. It gives you a checklist of what to look for in a cheaper plan and questions to ask.
3. You compare offers yourself. NT can check a plan page you paste against your checklist.

NT WILL NEVER

- Never recommends or ranks a company.
- Never switches anything. Insurance changes stay with you and a licensed agent.

For builders

normie-tools/skills/cheaper-plan

SKILL Usage extraction from screenshots and bills; neutral checklist per category; compare-a-pasted-plan mode that checks fit without endorsing.

ENGINE None needed.

TEST Fake bills and usage screenshots. Pass bar: usage numbers exact, zero company recommendations.

DEMO Staged, made-up files, demo account. Staged: a fake unlimited plan vs 4 GB of real use.

RISK Coverage gaps on insurance. The checklist lists what to keep and says to confirm with a licensed agent.

NT
Launch post draft

NT 13 BUDGET AND SAVING

Price Drop Watch

Keep a short list of things you want, and check if the price dropped before you buy.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, Grok, and the NT App | Uses free official data

Who it helps

Anyone buying a bigger item who wants to wait for a better price.

Get ready

1. Copy the product link from the store's page.
2. Paste it in the chat, or into the NT App's watch list.

What you get

- A watch list (CSV) with each check's date and price.

What you say

YOU Watch this vacuum for me and tell me if it drops under $200.

What happens

1. NT notes the item, today's price from the store page, and your target.
2. When you ask, or each week in the NT App, it checks the store page again.
3. If it drops, you get a message with the link. You buy it yourself.

NT WILL NEVER

- Never buys anything.
- Never uses price-tracking sites that need your login.

For builders

normie-tools/skills/price-drop

SKILL Reads the price from the product page the person gave, stores target and history, re-checks on request (chat) or on a weekly schedule (NT App). Respects each store's terms; if a page blocks checks, says so.

ENGINE watch.py stores the list and compares prices; the page read is done by the agent's own browsing.

TEST Saved product pages with known prices. Pass bar: price read exactly, no false alerts.

DEMO Staged, made-up files, demo account. Staged: a demo item drops below its target and a calm alert appears.

RISK Store pages vary and some forbid automated checks: to confirm per store before shipping scheduled checks.

NT
Launch post draft

I told my AI my price. It told me when the vacuum hit it.

NT 14 BUDGET AND SAVING

Credit Report Check

Get your free credit reports from the official site, and see in plain words what's on them and anything that looks wrong.

EFFORT M
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info

Who it helps

Anyone applying for an apartment, a car loan, or a job, or worried about identity theft.

Get ready

1. Go to AnnualCreditReport.com (the official free site) and request your reports. NT walks you through it.
2. Download each report as a PDF.

What you get

A plain summary PDF and filled-in dispute letters.

What you say

YOU Here are my three credit reports. Is anything wrong or anything I should fix?

What happens

1. NT reads each report and lists your accounts, balances, and late payments in a simple table.
2. It marks anything that looks wrong, like an account you don't know or a debt listed twice.
3. For each problem, it fills in a dispute letter for you to send yourself.

NT WILL NEVER

- Never asks for your Social Security number.
- Never pays for credit repair or signs you up for monitoring.

CHECKED NOVEMBER 4, 2026

OFFICIAL SOURCE AnnualCreditReport.com is the official site. Free weekly reports from Equifax, Experian, and TransUnion became permanent in 2023 (FTC).

For builders

normie-tools/skills/credit-report-check

SKILL Parses the three bureau formats, cross-checks accounts across reports, flags likely errors, and fills dispute letters from My Info.

ENGINE report.py extracts accounts and compares the three reports.

TEST Made-up reports in each bureau's layout with planted errors. Pass bar: all planted errors found, zero false "fraud" claims.

DEMO Staged, made-up files, demo account. Staged: three demo reports with one account the person doesn't recognize.

RISK Wrong flags. NT says "looks wrong, check it", never "this is fraud".

NT
Launch post draft

Free credit reports, read in plain words, and dispute letters ready to send.

normie-tools/skills/credit-report-check

NT 15 BUDGET AND SAVING

Benefits Finder

Find government help you may qualify for, like food, heating, or health programs, using the official benefit finder.

EFFORT S
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Families who are stretched thin and don't know what help exists.

Get ready

1. Nothing to download. Answer a few questions, or let NT use My Info with your OK.

What you get

A short list PDF with official links and a papers-to-gather checklist.

What you say

YOU We're having a hard month. What help could we get?

What happens

1. NT asks a few plain questions about your household, like how many people and your state.
2. It walks you through the official USA.gov benefit finder and explains each result in plain words.
3. You get a list of programs to look at, with official links and the papers each one asks for.

NT WILL NEVER

- Never applies for you or promises you qualify.
- Never sends you to sites that charge to apply.

CHECKED NOVEMBER 4, 2026
OFFICIAL SOURCE USA.gov Benefit Finder at usa.gov/benefit-finder (checked November 4, 2026).

For builders

normie-tools/skills/benefits-finder

SKILL Question flow aligned to USA.gov's Benefit Finder; explains results; papers checklist per program; links only to .gov.

ENGINE None needed.

TEST 30 household personas checked against the official finder by a person. Pass bar: every link .gov, no program claimed that the finder didn't list.

DEMO Staged, made-up files, demo account. Staged: a demo household gets a short list with official links.

RISK Eligibility is decided by agencies. NT says "you may qualify, apply to find out".

NT
Launch post draft

Hard month? My AI walked me through the official benefit finder in plain words.

normie-tools/skills/benefits-finder

NT 16 TAXES

Tax Filing Helper

Get your return ready in a free, official filing site, then review it and press Submit yourself.

EFFORT M
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info | Ship first, #3

Who it helps

People who can file a simple return and want free, step-by-step help getting it done.

Get ready

1. Gather your tax papers (the Tax Folder Organizer helps).
2. Have last year's AGI or your 5-digit signature PIN handy. NT shows you where to find it.
3. From January 2027, open IRS Free File through IRS.gov.

What you get

A fill sheet PDF that matches the free site screen by screen, a checklist of what you entered, and a saved copy of your confirmation.

What you say

YOU Help me file my taxes for free. Here are my W-2 and my 1099.

What happens

1. NT checks which free route fits you and tells you why, in plain words.
2. It builds a line-by-line fill sheet from your papers. With an agent that can use a browser, it types the answers into the free site while you watch.
3. You review every page, sign in and sign yourself, and press Submit. NT then saves your confirmation.

NT WILL NEVER

- Never presses Submit, signs, or pays for you.
- Never gives tax advice or picks deductions. It points you to free help (VITA) when your return is not simple.

CHECKED NOVEMBER 4, 2026

IRS DIRECT FILE	Not offered in the 2026 filing season, and the IRS set no future launch date. NT does not plan on it.
IRS FREE FILE	Extended through October 2029; reopens on IRS.gov in January 2027. Last season: guided software at AGI of $95,000 or less (partners set their own rules), and Fillable Forms for any income, federal only.
FREE HELP	VITA and TCE sites, found through IRS.gov. Some states offer free state filing on their own .gov sites.
TO CONFIRM	The 2027 income limit and partners (posted in January), and whether each route's terms allow a browser agent to fill screens.

For builders

normie-tools/skills/tax-filing

SKILL	Plain eligibility questions, a fill sheet keyed to each free route, and browser-assist: the person signs in, the agent fills fields while they watch, and stops on the review page.
ENGINE	fillsheet.py maps each paper to the screen it goes on (W-2 box 1 to wages, and so on) and checks totals twice.
TEST	20 made-up returns with answer keys. Pass bar: every field matches, zero submits in every run.
DEMO	Staged, made-up files, demo account. Staged: made-up W-2 in a demo account on a practice screen. The clip ends on the review page with the person's hand on the mouse.
RISK	Highest risk tool. It organizes and types only, never decides.

NT
Launch post draft

My AI got my free tax return ready. I checked it and pressed Submit myself.

normie-tools/skills/tax-filing

NT 17 TAXES

Bank CSV to Tax Categories

Turn a year of bank downloads into tax categories and a one-page summary for whoever does your taxes.

EFFORT M
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

People who do a side job, sell things, or just want their tax helper to have a clean list.

Get ready

1. Log in to your bank's website on a computer.
2. Open the account, then find Download or Export.
3. Pick CSV and the dates you want. Save the file.
4. Do this for each account you use.

What you get

A spreadsheet (XLSX or CSV) with every charge sorted, and a one-page PDF summary to hand to a tax preparer or a free tax help site.

What you say

YOU Here are my bank files for last year. Sort them for taxes and make a summary for my tax helper.

What happens

1. You attach the files and answer a few questions, like what kind of work you do.
2. NT sorts every charge into simple groups and marks the ones it isn't sure about.
3. You check the unsure ones, then download a spreadsheet and a one-page summary.

NT WILL NEVER

- Never files your taxes or tells you what you can deduct.
- Never guesses silently. Unsure charges are marked for you.

For builders

normie-tools/skills/tax-categories

SKILL Reads the CSVs, maps columns once, sorts charges into plain groups (business supplies, mileage-related, home office, personal), asks about unsure rows, and ends by pointing to the preparer or to IRS Free File and VITA in general terms.

ENGINE categorize.py merges CSVs from many banks, applies an editable rules file, and writes the XLSX and PDF.

TEST Fake year of statements in 4 bank layouts with a known answer key. Score how many rows land in the right group.

DEMO Staged, made-up files, demo account. Three fake bank files dropped into the chat, two questions answered, the summary PDF opens.

RISK Tax advice risk. The skill states it organizes only, and every group name is neutral, not a deduction claim.

NT
Launch post draft

Gave my AI a year of bank downloads. Got back a clean tax summary for my preparer. Free skill.

normie-tools/skills/tax-categories

NT 18 TAXES

Year-End Tax Checklist

Get a personal list of every tax paper you should gather, based on your life this year.

EFFORT S
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Anyone who gets to tax time and isn't sure which forms they are missing.

Get ready

1. Nothing to download. Just answer the questions.
2. Optional: attach last year's tax return so NT can see what you had before.

What you get

A printable checklist PDF and a spreadsheet version with a "got it" column.

What you say

YOU Make me a checklist of the tax papers I need this year. I had a job, I drove for a delivery app, and I paid student loans.

What happens

1. NT asks short yes or no questions about work, school, home, and family.
2. It builds a checklist of the papers people usually get for each one, like a W-2 from a job.
3. You download the checklist and tick items off as they arrive.

NT WILL NEVER

- Never tells you what to claim.
- Never asks for your Social Security number.

For builders

normie-tools/skills/tax-checklist

SKILL A question tree in SKILL.md plus a reference table of common forms by life event, each row with a plain note on who sends it. Ends by pointing to a preparer, IRS Free File, or VITA in general terms.

ENGINE checklist.py renders the answers into PDF and XLSX for coding tools.

TEST Ten scripted personas. Check each checklist against a reviewed expected list.

DEMO Staged, made-up files, demo account. A person answers four questions and a neat checklist prints.

RISK Form names change. The reference table carries a source link and a checked date per row.

NT
Launch post draft

Tax time, sorted before it starts. A free checklist made from your own answers.

normie-tools/skills/tax-checklist

NT 19 TAXES

Tax Folder Organizer

Drop in your W-2s, 1099s, and receipts and get one tidy, labeled packet for your tax helper.

EFFORT M
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info

Who it helps

People who have tax papers scattered across email, photos, and a kitchen drawer.

Get ready

1. Take a photo of each paper, or save PDFs from emails.
2. Put them all in one message.

What you get

- One combined PDF packet with a cover page, plus a spreadsheet index of every paper.

What you say

YOU Here are all my tax papers. Put them in order, label them, and tell me what's missing from my checklist.

What happens

1. You attach your papers. Photos are fine.
2. NT reads each one, names it in plain words, and puts them in a sensible order.
3. You download one combined PDF with a cover page that lists what's there and what's still missing.

NT WILL NEVER

- Never sends your papers anywhere.
- Never fills in or files a return.

For builders

normie-tools/skills/tax-organizer

SKILL Classifies each file by form type, extracts payer name and tax year only, compares against the Year-End Tax Checklist output, builds the packet.

ENGINE packet.py merges and orders PDFs and images into one file with a cover page.

TEST Fake forms with made-up payers. Check classification and order.

DEMO Staged, made-up files, demo account. Eight messy photos of fake forms become one clean packet with a cover page.

RISK Sensitive numbers. The skill never repeats full ID numbers in chat and masks them in the index.

NT
Launch post draft

Eight crumpled tax papers in, one tidy packet out. Your tax helper will thank you.

normie-tools/skills/tax-organizer

NT 20 TAXES

Mileage Log

Build a clean mileage log from your calendar or a list of trips.

EFFORT M

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file or use your email | On the NT website

Who it helps

Gig drivers, home care workers, and anyone who drives for work.

Get ready

1. Export your calendar for the year (in Google Calendar: Settings, then Import and export).
2. Or type your trips: date, from, to.

What you get

- A mileage log spreadsheet with date, purpose, start, end, and miles.

What you say

YOU Make a mileage log for my work trips last year from my calendar.

What happens

1. You attach your calendar file or list your trips.
2. NT finds work trips and asks you to confirm each kind.
3. You type in miles or let NT estimate with a map, then download the log.

NT WILL NEVER

- Never makes up trips.
- Never says what your miles are worth on your taxes.

For builders

normie-tools/skills/mileage-log

SKILL Reads .ics or a connector calendar read-only, filters likely work trips, asks the user to confirm, estimates distance only when the app can browse a map and labels it as an estimate.

ENGINE mileage.py parses .ics and writes the log.

TEST Fake calendars with known work trips.

DEMO Staged, made-up files, demo account. A year of fake events becomes a 40-trip log.

RISK Made-up miles. Every estimate is labeled and the user confirms.

NT
Launch post draft

Turned my calendar into a mileage log in one chat.

normie-tools/skills/mileage-log

NT 21 FORMS AND PAPER: FLAGSHIP, 1 OF 2

Form Filler

Upload any PDF form. Fill it one short section at a time on your phone or computer, then sign the finished PDF.

EFFORT M

WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info | Ship first, #2

Who it helps

Anyone facing a long form: school, benefits, a lease, a doctor's office, the DMV.

How it works

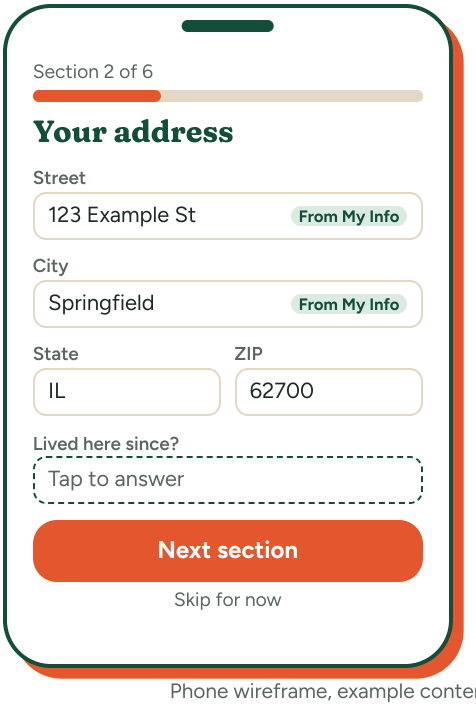

1. **Upload any PDF.** A fillable form, a scan, or a phone photo of paper.
2. **NT finds every blank** and groups them into a few short sections, like "About you" and "Address".
3. **Fill one section at a time** on your phone or computer. Answers from My Info are already in; you just check them.
4. **Review** every answer on one screen, next to the real form.
5. **Get the filled PDF** with a clear "Sign here" spot. Sign on screen, or print and sign.

NT WILL NEVER

- Never submits or sends the form for you.
- Never guesses an answer. Blanks stay marked until you fill or skip them.
- Never signs for you. You draw, type, or hand-sign.

What you say

YOU Help me fill out this form. It's a scan from the school.

Phone wireframe, example content only.

What you get

A filled PDF that looks like the original form, with a "Sign here" spot, plus a one-page list of your answers to keep.

Works on any screen

Phone: one section per screen, big fields, Next button. Computer: the real form on the left, the section on the right. Same answers, saved on your device, so you can start on one and finish on the other with an export file.

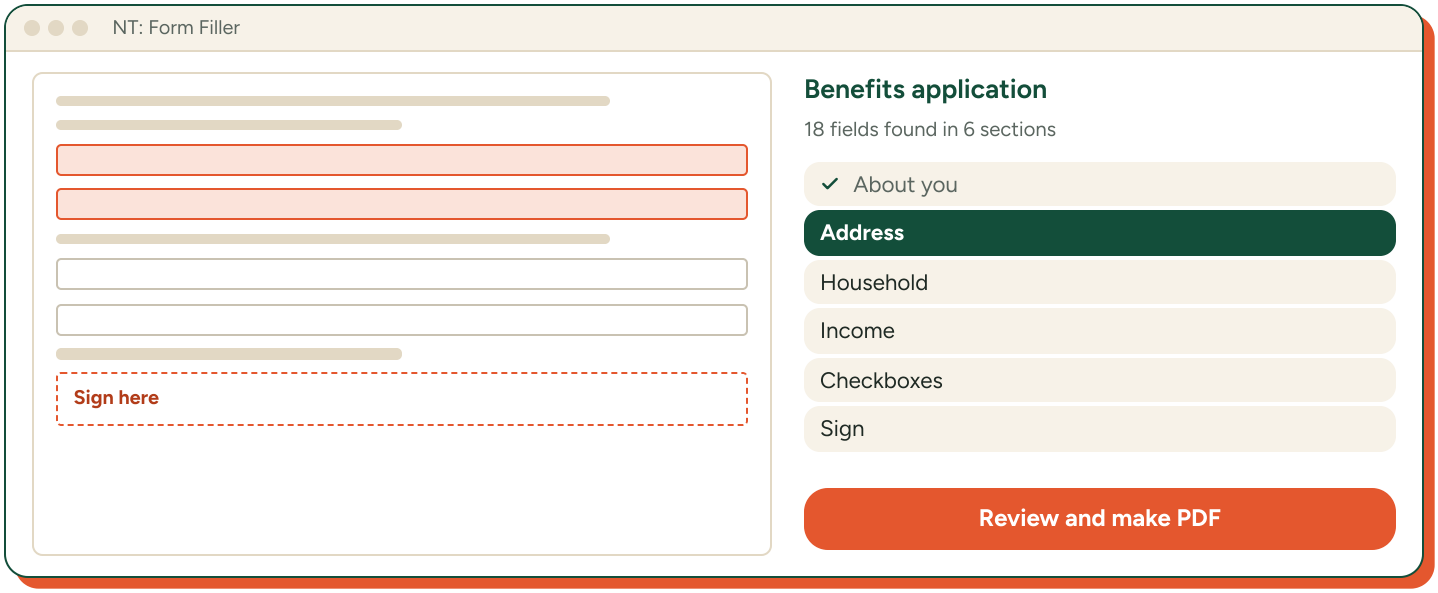

NT
Launch post draft

Uploaded a 6-page school form. Filled it on my phone in 4 minutes. Signed it at the end. Free.

normie-tools/skills/form-filler

NT 21 FORM FILLER: FLAGSHIP, 2 OF 2

Desktop, signing, and how we build it

Desktop wireframe, example content only. The form on the left lights up the fields of the section you are on.

Signing

- **Draw** with a finger or mouse, or **type** your name in a script font, then place it on the "Sign here" spot.
- Or **print and sign** by hand. The PDF prints with the spot clearly marked.
- The signature stays on your device. NT never saves it unless you ask.
- Then you submit it the way the form says: upload, email, mail, or in person.

Pairs with

Form Finder gets the official, current blank. **My Info** fills the basics. **Phone Photo to Scan** cleans up paper forms first.

For builders

FILLABLE FORMS

Read and fill AcroForm fields with pypdf (BSD, release 6.21.4 on Oct 28, 2026) in the engine, and pdf-lib (MIT) in the browser. pdf-lib's last code push was July 2024, so we pin it and keep pypdf as the reference. Forms that also carry XFA (the 2025 Form 1040 has 229 AcroForm fields and an XFA layer) get the XFA layer removed so readers show the AcroForm values.

FLAT OR SCANNED

Detect blanks with CommonForms' FFDNet models (text, checkbox, signature; FFDNet-S is about 6 to 9 million parameters, small enough for CPU). Read the nearby label with on-device OCR (Tesseract). License: the repo shows no license and it depends on ultralytics, which is AGPL-3.0: TO CONFIRM before shipping, or train our own detector

TINY-MODEL PLAN

Field finding, grouping by position, and filling are deterministic code. The model only writes a plain question for each label and suggests section names.

TEST SET

100 real blank forms from .gov sites (50 fillable, 50 flat), each with a hand-made answer key. Pass bar: 100% of fillable fields found and filled correctly, 95% of flat-form blanks found, 0 values in the wrong field, and every output opens correctly in three PDF readers.

NT 22 FORMS AND PAPER

Form Finder

Find the right official form for a task, straight from the government site, and check that it's the current version.

EFFORT M

WOW ●●●●● 5/5

Works in Claude, ChatGPT, Grok, and the NT App | Uses free official data | Fills from My Info

Who it helps

Anyone who has ever downloaded the wrong or outdated form.

Get ready

1. Nothing to download. Say what you need to do, like "change my address with the post office".

What you get

- A link to the official form, its name, number, and revision date.

What you say

YOU I need the form to request more time to file my taxes.

What happens

1. NT searches only official sites, like irs.gov, usa.gov, and your state's .gov site.
2. It shows you the form, the link, and its revision date, and warns you if a newer one exists.
3. You download it from the official link, then fill it with the Form Filler.

NT WILL NEVER

- Never gives you a copy from a third-party site.
- Never edits a form or hides its source.

CHECKED NOVEMBER 4, 2026

ALLOWLIST CISA publishes the full list of .gov domains as a public CSV (cisagov/dotgov-data). NT uses it plus a hand-checked list of official agency sites that are not .gov.

VERSION CHECK Checked November 4, 2026: irs.gov/pub/irs-pdf/f1040.pdf is titled "2025 Form 1040". NT reads the title and revision from the PDF itself every time.

For builders

normie-tools/skills/form-finder

SKILL Allowlist: .gov domains checked against CISA's public .gov registry, plus a short hand-checked list of agency sites. Every result shows domain, form number, revision date from the PDF itself, and a newer-version check.

ENGINE formcheck.py downloads the PDF from the official URL, reads its revision line and title, and checks the agency's current forms list.

TEST 100 tasks with known correct forms. Pass bar: 100% official domain, 100% current revision, 0 third-party links; recheck monthly.

DEMO Staged, made-up files, demo account. Staged: "extension to file" finds Form 4868 on irs.gov with its revision date shown.

RISK Stale forms. Revision is read from the PDF each time; any mismatch with the agency list blocks the result.

NT
Launch post draft

My AI only gives me forms from the real .gov site, and tells me if there's a newer one.

normie-tools/skills/form-finder

NT 23 FORMS AND PAPER

PDF Combine and Shrink

Combine, split, or shrink PDFs without uploading them to a random website.

EFFORT S

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone sending forms to a school, landlord, or job with a size limit.

Get ready

1. Save the PDFs or photos you need.
2. Attach them in the order you want.

What you get

One PDF.

What you say

YOU Put my lease, ID scan, and two pay stubs into one PDF under 5 MB.

What happens

1. You attach the files.
2. NT combines them in order and shrinks the result.
3. You download one PDF and NT tells you its size.

NT WILL NEVER

- Never changes your original files.

For builders

normie-tools/skills/pdf-tidy

SKILL Uses the app's file tools to merge, split, rotate, and compress, then checks page count and size.

ENGINE pdf_tidy.py (pypdf) for coding tools.

TEST Example PDFs with size targets.

DEMO Staged, made-up files, demo account. Four fake documents become one 4 MB PDF.

RISK Blurry text from shrinking. Warn when quality drops.

NT
Launch post draft

Stop uploading your ID to random PDF sites.

normie-tools/skills/pdf-tidy

NT 24 FORMS AND PAPER

Phone Photo to Scan

Turn a tilted phone photo of a paper into a clean, flat scan.

EFFORT M

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone without a scanner who has to send a signed form.

Get ready

1. Lay the paper on a dark table and take a photo from straight above.

What you get

One clean PDF.

What you say

YOU Make these three photos of my form into one clean PDF I can email.

What happens

1. You attach the photos.
2. NT straightens and cleans each page.
3. You download one PDF.

NT WILL NEVER

- Never changes what's written on the page.

For builders

normie-tools/skills/photo-to-scan

SKILL Uses the app's code tools to find page edges, flatten, and clean contrast. Falls back to plain crop when edges aren't found.

ENGINE scan.py (OpenCV) for coding tools.

TEST 20 fake form photos in bad light.

DEMO Staged, made-up files, demo account. A tilted kitchen-table photo becomes a clean scan.

RISK Edge detection fails on busy tables. Tell the person to use a plain surface.

NT
Launch post draft

No scanner? Photo in, clean PDF out.

normie-tools/skills/photo-to-scan

NT 25 FORMS AND PAPER

Plain Letter Explainer

Take a photo of a confusing letter and learn what it says and whether you need to act.

EFFORT S

WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone holding a tax notice, insurance letter, or court paper.

Get ready

1. Take a photo of each page.

What you get

- A summary card and a calendar reminder (.ics) for any deadline.

What you say

YOU I got this letter. Do I have to do anything?

What happens

1. You attach the photos.
2. NT finds who sent it, any amount, and any deadline, and quotes the lines.
3. You get a short plain summary and a reminder file for the deadline.

NT WILL NEVER

- Never pays or replies for you.
- Never trusts a phone number in a letter that asks for money.

For builders

normie-tools/skills/letter-explainer

SKILL Quotes every amount and date, explains in plain words, and checks for scam signs before any payment step.

ENGINE None needed.

TEST 15 fake letters with planted deadlines.

DEMO Staged, made-up files, demo account. A confusing fake notice becomes three plain sentences and a reminder.

RISK Advice limits are stated plainly.

NT
Launch post draft

Got a letter you don't understand? Photo in, plain answer out.

normie-tools/skills/letter-explainer

NT 26 FORMS AND PAPER

Lease Red Flags

Read a lease and get a plain list of things to ask about before you sign.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

First-time renters and students.

Get ready

1. Get the lease as a PDF from the landlord, or take photos of each page.

What you get

- A one-page report with quotes and page numbers.

What you say

YOU Read this lease and tell me what I should ask about before I sign Friday.

What happens

1. You attach the lease.
2. NT finds fees, renewal rules, repair rules, and notice periods, with page numbers.
3. You get a list of polite questions for the landlord.

NT WILL NEVER

- Never gives legal advice.
- Never contacts the landlord.

For builders

normie-tools/skills/lease-check

SKILL Checklist of common lease clauses, quote-every-claim rule, points to local tenant resources.

ENGINE None needed.

TEST 5 fake leases with planted clauses.

DEMO Staged, made-up files, demo account. A fake lease yields 5 flagged clauses with quotes.

RISK Local law varies. Point to official local resources.

NT
Launch post draft

My AI read my lease and quoted every clause worth asking about.

NT 27 FORMS AND PAPER

Letter Kit

Get a clear, polite letter for repairs, refunds, or disputes.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Tenants, customers, and anyone writing a formal letter for the first time.

Get ready

1. Nothing to download. Just tell NT what happened.

What you get

- A letter as DOCX and PDF, plus a list of what to attach.

What you say

YOU Write a letter asking my landlord to fix the heater. I told them by text on October 20.

What happens

1. NT picks the right letter type and asks for missing facts.
2. It writes a short, polite letter.
3. You download it as a document and send it yourself.

NT WILL NEVER

- Never sends anything.

For builders

normie-tools/skills/letter-kit

SKILL Eight reviewed templates with question flows.

ENGINE letter.py renders DOCX for coding tools.

TEST Tone review on sample letters.

DEMO Staged, made-up files, demo account. One sentence becomes a finished letter.

RISK No legal threats or citations in templates.

NT
Launch post draft

The letter you keep meaning to write.

normie-tools/skills/letter-kit

NT 28 FORMS AND PAPER

Big Print

Make any instructions big, clear, and easy to read for an older relative.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Adult children helping aging parents.

Get ready

1. Copy a web page link, or attach the document.

What you get

A large-print PDF.

What you say

YOU Make big print steps for my dad on how to join a video call on his tablet.

What happens

1. You share the instructions.
2. NT rewrites them as short numbered steps.
3. You download a large-print PDF to print.

NT WILL NEVER

- Never drops a step.

For builders

normie-tools/skills/big-print

SKILL Plain rewrite with numbered steps and a large-print template.

ENGINE bigprint.py renders the PDF.

TEST Readability review with older readers.

DEMO Staged, made-up files, demo account. A busy help page becomes a big, clear printout.

RISK Meaning drift. Offer original wording too.

NT
Launch post draft

Big print instructions for Dad in one message.

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info

Who it helps

Families who dig through wallets at every doctor visit.

Get ready

1. Take photos of the front and back of each card.

What you get

A one-page PDF.

What you say

YOU Make one page with all our insurance cards, front and back.

What happens

1. You attach the photos.
2. NT crops them and lays them out with each person's name.
3. You download one PDF and save it in a safe place.

NT WILL NEVER

- Never reads out full member numbers in chat.

For builders

normie-tools/skills/card-wallet

SKILL Crop and layout with labels; masks numbers in chat replies.

ENGINE cards.py for coding tools.

TEST Fake cards.

DEMO Staged, made-up files, demo account. Six fake card photos become one neat page.

RISK Sensitive data. Remind the person to store the file safely.

NT
Launch post draft

Every family insurance card on one page.

normie-tools/skills/card-wallet

NT 30 FORMS AND PAPER

Family Emergency Binder

Make a simple binder of who to call, what medicines, and where important papers are.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Families, caregivers, and anyone who wants their family to be ready.

Get ready

1. Nothing to download. Answer questions, and attach photos of lists if you have them.

What you get

- A printable binder PDF and an editable document.

What you say

YOU Help me make an emergency binder for my mom.

What happens

1. NT asks short questions: doctors, medicines, contacts, where papers are kept.
2. It builds clear pages with blanks for anything you skipped.
3. You download a PDF to print and a version to update later.

NT WILL NEVER

- Never asks for passwords or account numbers.

For builders

normie-tools/skills/emergency-binder

SKILL Section templates with a rule to store locations of papers, not their numbers.

ENGINE binder.py renders the PDF.

TEST Reviewed sample binder.

DEMO Staged, made-up files, demo account. Answers become a tidy printed binder.

RISK Sensitive info. Locations only, never passwords.

NT
Launch post draft

The binder every family needs, made in one chat.

normie-tools/skills/emergency-binder

NT 31 CONVERTERS

Image Converter

Turn iPhone photos (HEIC) into JPGs, shrink big pictures, or change any image to the type a website asks for.

EFFORT S
WOW ●●●●● 5/5

Runs on your device: NT website or NT App | Nothing is uploaded | Your AI can send you here

Who it helps

Anyone a website has told "file type not supported" or "file too large".

Get ready

1. Open the NT website or the NT App.
2. Tap Image Converter and drop in your pictures. Nothing is uploaded.

What you get

New image files (JPG, PNG, WebP, and more), each at the size you asked for.

What you say

YOU Turn these iPhone photos into JPGs under 2 MB so I can upload them.

What happens

1. NT reads each picture on your device and shows the new type and size before it starts.
2. You pick a size goal, like "under 2 MB", or a type, like JPG or PNG.
3. You press Convert and download the new files. Your originals stay as they were.

NT WILL NEVER

- Never uploads your file. It is converted on your own phone or computer.
- Never replaces your original. You get a new file next to it.

CHECKED NOVEMBER 4, 2026

ON DEVICE wasm-vips (MIT wrapper; libvips and some parts LGPLv3) needs the site to send cross-origin isolation headers (COOP and COEP). Basic JPG, PNG, and WebP work with the browser's own decoders. HEIC decoding in each browser: to confirm.

For builders

normie-tools/skills/image-converter

SKILL Plain-words goal (type, size, pixel size) turned into exact settings by the engine; batch preview of size per file.

ENGINE Browser: built-in image decoding, then wasm-vips for resizing and encoding. NT App: native libvips. Same settings file in both.

TEST 300 sample images in 12 types including HEIC, PNG with transparency, and huge scans. Pass bar: every output opens, every size goal met, EXIF orientation kept.

DEMO Staged, made-up files, demo account. Staged: 20 demo HEIC photos become JPGs under 2 MB in the browser, with the network panel showing no upload.

RISK HEIC support differs by browser. Where the browser can't read HEIC, NT says so and offers the NT App.

NT
Launch post draft

"File type not supported"? My iPhone photos became JPGs right in my browser. Nothing uploaded.

normie-tools/skills/image-converter

NT 32 CONVERTERS

Video Converter

Shrink a video so it fits in a text or email, or change it to a type that plays everywhere.

EFFORT M
WOW ●●●●● 5/5

Runs on your device: NT website or NT App | Nothing is uploaded | Your AI can send you here

Who it helps

Families sharing videos, and anyone told "this file is too big to send".

Get ready

1. Open the NT website or the NT App.
2. Tap Video Converter and drop in the video. Nothing is uploaded.

What you get

A new MP4 (or WebM) video at the size you chose.

What you say

YOU Make this video small enough to email.

What happens

1. NT checks the video on your device and offers simple choices: "for email", "for a text", "plays everywhere".
2. It shows the new size and how long it will take before it starts.
3. You press Convert and download the new video. The original stays as it was.

NT WILL NEVER

- Never uploads your file. It is converted on your own phone or computer.
- Never replaces your original. You get a new file next to it.

CHECKED NOVEMBER 4, 2026

ON DEVICE Mediabunny (MPL-2.0) uses the browser's WebCodecs. Full WebCodecs: Safari 26+, Chrome and Edge 94+, Firefox desktop 130+; Safari 16.4 to 18.7 had video only; Firefox for Android has none. The standard ffmpeg.wasm core is GPL-2.0-or-later and caps input at 2 GB, and iPhone Safari users report crashes around 400 to 800 MB, so NT builds its own LGPL FFmpeg and caps phone files.

For builders

normie-tools/skills/video-converter

SKILL Preset picker (email 25 MB, text, plays everywhere) mapped to exact bitrate, size, and codec by the engine; time estimate from a short test encode.

ENGINE Browser: Mediabunny on the browser's own WebCodecs encoders. NT App: an LGPL build of FFmpeg using the computer's hardware encoders.

TEST 60 sample videos (phone, screen recording, old camera). Pass bar: every output plays in Safari, Chrome, and Windows Media Player and meets its size goal.

DEMO Staged, made-up files, demo account. Staged: a 180 MB demo phone video becomes 22 MB for email, converted on the device.

RISK Big files on phones. Above about 300 MB on a phone, NT suggests the NT App on a computer instead of crashing the browser.

NT
Launch post draft

My 180 MB video wouldn't send. Now it's 22 MB and it never left my phone.

normie-tools/skills/video-converter

NT 33 CONVERTERS

Audio Converter

Change voice memos and recordings into MP3s that play anywhere, or make big audio files smaller.

EFFORT S
WOW ●●●●○ 4/5

Runs on your device: NT website or NT App | Nothing is uploaded | Your AI can send you here

Who it helps

Anyone with a voice memo, voicemail, or recording that won't open for someone else.

Get ready

1. Open the NT website or the NT App.
2. Tap Audio Converter and drop in the file. Nothing is uploaded.

What you get

- A new audio file (MP3, M4A, WAV, and more).

What you say

YOU Turn this voice memo into an MP3 my mom can play.

What happens

1. NT reads the file on your device and suggests MP3 for "plays anywhere".
2. You can also trim the start and end, or make it louder.
3. You press Convert and download the new file. The original stays as it was.

NT WILL NEVER

- Never uploads your file. It is converted on your own phone or computer.
- Never replaces your original. You get a new file next to it.

For builders

normie-tools/skills/audio-converter

SKILL Presets (plays anywhere, smallest, best quality), trim and volume, all as exact engine settings.

ENGINE Browser: Mediabunny and WebCodecs where the browser supports audio encoding, else a small LGPL FFmpeg module. NT App: the same LGPL FFmpeg build.

TEST 100 sample recordings in 10 types. Pass bar: every output plays on iPhone, Android, Windows, and Mac.

DEMO Staged, made-up files, demo account. Staged: a demo voice memo becomes an MP3 and plays on a demo phone.

RISK Older Safari versions lack audio encoding. NT checks first and uses its fallback.

NT
Launch post draft

Voice memo won't open for grandma? One drop, one button, an MP3.

normie-tools/skills/audio-converter

NT 34 CONVERTERS

Document Converter

Change documents between Word, PDF, plain text, web pages, and ebooks (EPUB), on your own device.

EFFORT M

WOW ●●●●○ 4/5

Runs on your device: NT website or NT App | Nothing is uploaded | Your AI can send you here

Who it helps

Students, job seekers, and anyone asked for "a Word file" or "a PDF".

Get ready

1. Open the NT website or the NT App.
2. Tap Document Converter and drop in the file. Nothing is uploaded.

What you get

A new document: DOCX, PDF, EPUB, HTML, Markdown, or plain text.

What you say

YOU Turn my Word resume into a PDF, and this long article into an ebook for my e-reader.

What happens

1. NT reads the file on your device and shows which types it can make.
2. You pick the new type. For PDFs, you see a preview first.
3. You press Convert and download the new file.

NT WILL NEVER

- Never uploads your file. It is converted on your own phone or computer.
- Never replaces your original. You get a new file next to it.

CHECKED NOVEMBER 4, 2026

ON DEVICE pandoc 3.9 (Feb 2026) added an official WebAssembly build. It can't make PDFs by itself; pandoc's own web app pairs it with Typst in WebAssembly. Download is about 16 MB compressed. Pandoc is GPL-2.0-or-later, so it ships as a separate module with its source offered.

For builders

normie-tools/skills/document-converter

SKILL Type picker plus a preview step; tables and images checked after conversion with a plain note if layout changed.

ENGINE Browser: the official pandoc.wasm (pandoc 3.9) for most types, and Typst compiled to WebAssembly for PDF output, as pandoc's own web app does. NT App: the same modules.

TEST 200 sample documents with tables, images, and lists. Pass bar: text 100% kept, every output opens in Word, LibreOffice, and Apple Books where relevant.

DEMO Staged, made-up files, demo account. Staged: a demo resume DOCX becomes a PDF; a demo article becomes an EPUB.

RISK Complex Word layouts can shift. NT shows a preview and says when layout changed.

NT
Launch post draft

Word to PDF, article to ebook, right in my browser. No upload, no signup.

normie-tools/skills/document-converter

NT 35 CONVERTERS

Unit Converter

Convert cups to grams, Celsius to Fahrenheit, kilometers to miles, and more, with the steps shown.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Cooks, travelers, students, and anyone reading instructions from another country.

Get ready

1. Nothing to download. Just ask, or open Unit Converter on the NT website.

What you get

- An answer on screen, and a printable conversion card if you want one.

What you say

YOU How many grams is 2 and a half cups of flour?

What happens

1. NT finds the units in your question and asks if anything is unclear, like which kind of cup.
2. It does the math with exact conversion tables, not guesses.
3. You get the answer, rounded sensibly, with the math shown.

NT WILL NEVER

- Never guesses an ingredient weight. It uses a listed table or tells you it doesn't know.
- Never rounds medicine doses. It says to ask a pharmacist.

For builders

normie-tools/skills/unit-converter

SKILL Unit parser plus exact tables (length, weight, volume, temperature, area, speed, cooking by ingredient density from USDA data).

ENGINE units.py does all the math; the model only finds the units in the question.

TEST 500 conversion questions with known answers. Pass bar: 100% exact.

DEMO Staged, made-up files, demo account. Staged: "2 and a half cups of flour in grams" with the math shown.

RISK Cooking conversions depend on the ingredient. The table names its source for each one.

NT
Launch post draft

Cups to grams, the right way. My AI shows the math.

normie-tools/skills/unit-converter

NT 36 FILES, PHOTOS, AND STORAGE

Storage Checker

See what's filling up your computer or phone, in big simple boxes, and free space safely.

EFFORT M
WOW ●●●●● 5/5

Runs in the NT App: Windows, Mac, Linux | Your agent can run it too

Who it helps

Anyone who sees "disk full" or "storage almost full".

Get ready

1. Open the NT App on your computer.
2. Tap Storage Checker. It looks at your drive. Nothing changes.
3. On a phone, add a screenshot of your Storage screen instead.

What you get

A clear storage picture, and freed space you can undo.

What you say

YOU Why is my computer full?

What happens

1. NT shows big boxes for Photos, Videos, Downloads, Apps, and Other, with sizes.
2. It lists safe ideas first, like old installers and duplicate photos, with how much each frees.
3. You pick one and press one button. Files go to the Trash, and Undo is one tap.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/storage-checker

SKILL Disk scan with size buckets; safe-first suggestions that hand off to Photo Duplicate Finder, Large File Finder, and Downloads Tidy. Phone mode reads a storage screenshot.

ENGINE nt storage scan --json (NT App CLI) returns sizes, so an agent or small model only explains them.

TEST Test drives with planted files on Windows, macOS, Ubuntu, and Omarchy. Pass bar: sizes match the OS to within 1%.

DEMO Staged, made-up files, demo account. Staged: a demo laptop shows 42 GB of old installers and frees it in one press.

RISK System files. NT never touches system or app folders.

NT
Launch post draft

Computer full? One screen showed me what was taking space, and freed 40 GB with undo.

normie-tools/skills/storage-checker

NT 37 FILES, PHOTOS, AND STORAGE

Photo Duplicate Finder

Find copies and near copies of your photos, keep the best one, and free space safely.

EFFORT M

WOW ●●●●● 5/5

Runs in the NT App: Windows, Mac, Linux | Your agent can run it too | Ship first, #4

Who it helps

Families with years of photos copied between phones and computers.

Get ready

1. Open the NT App on your computer.
2. Tap the Photo Duplicates tile.
3. Pick a folder or drop files in. Nothing changes yet.

What you get

- Grouped results on screen, a CSV of what moved, and freed space.

What you say

YOU Find my duplicate photos and keep the best ones.

What happens

1. NT groups photos that are the same, or almost the same, like burst shots.
2. It picks the sharpest, largest one in each group, and you can change the pick.
3. You press one button. The extras go to the Trash, and Undo puts them back.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/photo-duplicates

SKILL Exact duplicates by content hash, near duplicates by perceptual hash with a review grid. Keep-rules: largest, sharpest, oldest date, or has location.

ENGINE nt photos dupes --preview runs the hashing; agents only confirm the plan.

TEST A test library with 500 planted duplicates and 50 look-alikes that are not duplicates. Pass bar: all planted found, zero look-alikes moved.

DEMO Staged, made-up files, demo account. Staged: a demo library of 3,000 photos frees 6 GB in two clicks.

RISK Wrong pick. Near duplicates always need a look; exact copies can be one-click.

NT
Launch post draft

3,000 photos, 600 duplicates, two clicks, all undoable.

normie-tools/skills/photo-duplicates

NT 38 FILES, PHOTOS, AND STORAGE

ID Photo Maker

Turn a phone photo into a passport or ID photo with the right size.

EFFORT M

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone renewing a passport or making a badge.

Get ready

1. Stand in front of a plain light wall. Have someone take your photo.

What you get

A digital photo and a 4x6 print sheet.

What you say

YOU Make a passport photo from this picture and a sheet I can print.

What happens

1. You attach the photo and say which document.
2. NT crops it to the size rules for that document.
3. You download the photo and a print sheet.

NT WILL NEVER

- Never changes your face.

For builders

normie-tools/skills/id-photo

SKILL Preset table with official source links; crop and scale with the app's code tools.

ENGINE idphoto.py with face detection for coding tools.

TEST Staged volunteer photos.

DEMO Staged, made-up files, demo account. A selfie becomes a print-ready sheet.

RISK Rules change. Show the source and checked date.

NT
Launch post draft

Passport photo from your phone, sized right.

normie-tools/skills/id-photo

NT 39 FILES, PHOTOS, AND STORAGE

Share-Safe Photos

Shrink photos for upload limits and remove hidden location data before sharing.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Parents posting photos and people selling items online.

Get ready

1. Attach the photos straight from your phone.

What you get

Smaller photos with no location data.

What you say

YOU Make these photos small enough for my listing and remove the location.

What happens

1. You attach the photos.
2. NT checks which ones hold location data and removes it in new copies.
3. You download the safe copies.

NT WILL NEVER

- Never changes your originals.

For builders

normie-tools/skills/share-safe

SKILL Strip metadata and resize with the app's code tools, then re-read to confirm.

ENGINE sharesafe.py for coding tools.

TEST Re-read tests on every output.

DEMO Staged, made-up files, demo account. Photos with fake GPS tags come back clean.

RISK Some chat apps may strip data on upload already. Report what was found.

NT
Launch post draft

Your photos can show where you live. Strip it in one step.

normie-tools/skills/share-safe

NT 40 FILES, PHOTOS, AND STORAGE

Large File Finder

List the biggest files on your computer, with plain names, so you can move or remove the ones you don't need.

EFFORT S

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

Anyone low on space who doesn't know where the big stuff is.

Get ready

1. Open the NT App on your computer.
2. Tap the Large Files tile.
3. Pick a folder or drop files in. Nothing changes yet.

What you get

A list on screen, a CSV export, and freed space.

What you say

YOU What are the biggest files I can get rid of?

What happens

1. NT lists the 50 biggest files with size, date, and what kind of file it is in plain words.
2. It marks the safe ones, like old installers and copies of videos.
3. You tick what to move or remove, and press one button. Undo is one tap.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/large-files

SKILL Size scan with plain file-type labels and safe markers; excludes system, app, and cloud-placeholder files.

ENGINE nt files large --top 50 --json.

TEST Planted large files plus system decoys. Pass bar: zero system files listed.

DEMO Staged, made-up files, demo account. Staged: a 9 GB old video copy found and moved to an external drive.

RISK Cloud placeholders. Files that live in iCloud, OneDrive, or Google Drive are labeled and skipped by default.

NT
Launch post draft

Found 18 GB of old video copies in 10 seconds.

normie-tools/skills/large-files

NT 41 FILES, PHOTOS, AND STORAGE

Downloads Tidy

Clean up your Downloads folder in one press: sort it into simple folders and clear out old installers.

EFFORT S

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

Anyone whose Downloads folder has hundreds of files.

Get ready

1. Open the NT App on your computer.
2. Tap the Downloads Tidy tile.
3. Pick a folder or drop files in. Nothing changes yet.

What you get

A tidy Downloads folder and a log of every move.

What you say

YOU Clean up my Downloads folder.

What happens

1. NT shows how it will sort things: Documents, Pictures, Installers, Other.
2. It marks old installers you don't need anymore.
3. You press Tidy. Undo puts every file back where it was.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/downloads-tidy

SKILL Rule-based sorting by type and age, with an editable rules file and an undo journal.

ENGINE nt tidy downloads --preview / --apply / --undo.

TEST Folders with 1,000 planted files on each OS. Pass bar: undo restores every path exactly.

DEMO Staged, made-up files, demo account. Staged: 640 files become 5 folders, then Undo, then Tidy again.

RISK Files in use. Files open in another app are skipped.

NT
Launch post draft

640 files in my Downloads. One press. And Undo works.

normie-tools/skills/downloads-tidy

NT 42 FILES, PHOTOS, AND STORAGE

Desktop Cleanup

Clear a cluttered desktop into neat folders in one press, without losing anything.

EFFORT S

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

People who can't find anything on their desktop anymore.

Get ready

1. Open the NT App on your computer.
2. Tap the Desktop Cleanup tile.
3. Pick a folder or drop files in. Nothing changes yet.

What you get

A clean desktop and one folder with everything sorted inside.

What you say

YOU Clean up my desktop but don't lose anything.

What happens

1. NT shows a plan: keep shortcuts, sort files into a dated folder by type.
2. You can pin files that should stay put.
3. You press Clean Up. Undo puts it all back.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/desktop-cleanup

SKILL Same engine as Downloads Tidy with a desktop profile: shortcuts and pinned items stay.

ENGINE nt tidy desktop --preview / --apply / --undo.

TEST Desktops with planted files and shortcuts. Pass bar: shortcuts untouched, undo exact.

DEMO Staged, made-up files, demo account. Staged: a messy demo desktop clears in one press.

RISK Cloud-synced desktops (OneDrive, iCloud) are detected and handled as cloud folders.

NT
Launch post draft

My desktop had 212 icons. Now it has 4, and nothing is lost.

normie-tools/skills/desktop-cleanup

NT 43 FILES, PHOTOS, AND STORAGE

Screenshot Cleanup

Sort hundreds of screenshots: keep the useful ones in folders, and clear the rest safely.

EFFORT M
WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux | Your agent can run it too

Who it helps

Anyone with a camera roll or desktop full of old screenshots.

Get ready

1. Open the NT App on your computer.
2. Tap the Screenshots tile.
3. Pick a folder or drop files in. Nothing changes yet.
4. On a phone: export screenshots to your computer first. NT shows how.

What you get

Sorted screenshot folders and freed space.

What you say

YOU Help me clean up my screenshots.

What happens

1. NT finds screenshots and groups them: receipts, recipes, tickets, chats, other.
2. It suggests what to keep (like receipts) and what looks old and done.
3. You press one button. Kept ones go to folders, others to the Trash. Undo is one tap.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/screenshot-cleanup

SKILL Finds screenshots by file name and size patterns per OS, groups by on-device text reading (OCR), suggests keep or clear.

ENGINE nt shots sort --preview uses on-device OCR so nothing is uploaded.

TEST 500 demo screenshots with labels. Pass bar: 95% grouped right, receipts never cleared.

DEMO Staged, made-up files, demo account. Staged: 800 demo screenshots sorted; receipts saved to a Receipts folder.

RISK Private text in screenshots. OCR runs on the device only.

NT
Launch post draft

800 screenshots sorted on my own computer. Receipts kept, the rest cleared, undo ready.

normie-tools/skills/screenshot-cleanup

NT 44 FILES, PHOTOS, AND STORAGE

Folder Organizer

Turn a messy folder into a simple, sensible set of folders, with a plan you see first.

EFFORT M

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

People with one big folder of everything: school, work, family, bills.

Get ready

1. Open the NT App on your computer.
2. Tap the Folder Organizer tile.
3. Pick a folder or drop files in. Nothing changes yet.

What you get

An organized folder and a move log.

What you say

YOU Organize my Documents folder into simple folders.

What happens

1. NT suggests a few folders, like Bills, School, Work, Family, and shows what goes where.
2. You can rename folders or drag a file to a different one.
3. You press Organize. Undo puts every file back.

NT WILL NEVER

- Never deletes. Removed files go to your Trash or Recycle Bin first.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/folder-organizer

SKILL Groups by file type, names, dates, and (on request) on-device text reading. The model only names the groups; moves are done by the engine with an undo journal.

ENGINE nt organize <folder> --plan writes a plan file the agent can show and edit.

TEST Messy folders with a human-sorted answer key. Pass bar: 90% match, 100% undo.

DEMO Staged, made-up files, demo account. Staged: a demo Documents folder of 400 files becomes 6 folders.

RISK Bad folder names. The plan is always editable before anything moves.

NT
Launch post draft

400 files, 6 folders, one plan I could change, one press.

normie-tools/skills/folder-organizer

NT 45 FILES, PHOTOS, AND STORAGE

File Mover

Move lots of files to a new place, like an external drive, and check every one arrived.

EFFORT S

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

Anyone moving photos to a backup drive or files to a new computer.

Get ready

1. Plug in the drive if you're using one.
2. Open the NT App and tap File Mover.
3. Pick what to move and where.

What you get

Files in the new place and a check report.

What you say

YOU Move all my photos to my backup drive and make sure nothing gets lost.

What happens

1. NT shows how many files and how much space, and checks the drive has room.
2. You press Move. It copies first, checks each file matches, then clears the originals.
3. You get a report. Originals go to the Trash, so you can still undo.

NT WILL NEVER

- Never removes the original until the copy is checked.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/file-mover

SKILL Copy, verify by checksum, then trash originals; resumable if the drive is unplugged.

ENGINE nt move <src> <dest> --verify.

TEST Moves with a forced unplug halfway. Pass bar: zero lost files, resume works.

DEMO Staged, made-up files, demo account. Staged: 20 GB of demo photos to a demo drive, with the check report.

RISK Drive formats. NT warns when the drive can't hold big files (for example FAT32).

NT
Launch post draft

Moved 20 GB to my backup drive. Every file checked.

normie-tools/skills/file-mover

NT 46 FILES, PHOTOS, AND STORAGE

Bulk Rename

Rename many files at once into clear names, like "2026-07 Beach Trip 001", with a preview.

EFFORT S

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

People with files named IMG_4821 or scan0003 who want names they can find.

Get ready

1. Open the NT App on your computer.
2. Tap the Bulk Rename tile.
3. Pick a folder or drop files in. Nothing changes yet.

What you get

Renamed files and a log of old and new names.

What you say

YOU Rename my vacation photos with the date and "Beach Trip".

What happens

1. You say the pattern in plain words, or pick one.
2. NT shows a before and after list for every file.
3. You press Rename. Undo puts the old names back.

NT WILL NEVER

- Never overwrites a file with the same name.
- Never changes anything before you press the button, and Undo puts it all back.

For builders

normie-tools/skills/bulk-rename

SKILL Pattern builder (date taken, counter, text) with collision checks; plain-words pattern turned into a template by the model, applied by the engine.

ENGINE nt rename <folder> --pattern "{date:%Y-%m} Beach Trip {n:03}" --preview.

TEST Name collisions, odd characters, Windows reserved names. Pass bar: zero overwrites, undo exact.

DEMO Staged, made-up files, demo account. Staged: 120 demo photos renamed with a preview.

RISK Name rules differ by OS. The engine cleans names for Windows, macOS, and Linux.

NT
Launch post draft

IMG_4821 to "2026-07 Beach Trip 001". 120 files, one press.

normie-tools/skills/bulk-rename

NT 47 FILES, PHOTOS, AND STORAGE

Old Phone Backup Import

Bring photos and videos from an old phone or backup into one tidy, dated library without copies.

EFFORT M

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

Anyone with an old phone in a drawer or a pile of backup folders.

Get ready

1. Connect the old phone with a cable, or plug in the backup drive.
2. Open the NT App and tap Phone Import.
3. NT shows simple steps for your phone if it needs a setting changed.

What you get

- A tidy, dated photo library and an import report.

What you say

YOU Get the photos off my old phone and put them with my others, no duplicates.

What happens

1. NT finds photos and videos on the phone or backup.
2. It skips ones you already have and sorts the rest by year and month.
3. You press Import, and get a report of what came in.

NT WILL NEVER

- Never deletes anything from the old phone.
- Never uploads your photos anywhere.

For builders

normie-tools/skills/phone-backup-import

SKILL Import from mounted phones (MTP on Windows and Linux, Image Capture-style on macOS: to confirm per OS) and backup folders; dedupes against the library; sorts by date taken.

ENGINE nt import <source> --into <library> --preview.

TEST Demo phones and backup folders with overlaps. Pass bar: zero duplicates imported, zero source changes.

DEMO Staged, made-up files, demo account. Staged: an old demo phone's 1,200 photos merged, 300 duplicates skipped.

RISK Phone connection quirks. iPhone and Android steps are shown with screenshots and tested on real devices.

NT
Launch post draft

Old phone in a drawer for 4 years. Photos are now in my library, no doubles.

normie-tools/skills/phone-backup-import

NT 48 FILES, PHOTOS, AND STORAGE

Find a Lost File

Describe a file in plain words, like "the lease PDF from last spring", and NT finds it.

EFFORT S

WOW ●●●●○ 4/5

Runs in the NT App: Windows, Mac, Linux

Your agent can run it too

Who it helps

Anyone who saved something and can't find it.

Get ready

1. Open the NT App and tap Find a File.
2. Type what you remember. That's it.

What you get

The file you were looking for.

What you say

YOU Find the lease I signed last spring. I think it was a PDF.

What happens

1. NT turns your words into a search by type, date, and words inside the file.
2. It shows the best matches with a preview.
3. You open it, or show it in its folder.

NT WILL NEVER

- Never moves or changes files.
- Never uploads your files to search them.

For builders

normie-tools/skills/find-a-file

SKILL Uses the OS search index where available (Spotlight, Windows Search, a local index on Linux) plus filters the model builds from plain words.

ENGINE nt find "lease" --type pdf --after 2026-03 --json.

TEST Planted files with descriptions. Pass bar: right file in top 3 for 90% of queries.

DEMO Staged, made-up files, demo account. Staged: "the lease from last spring" finds the demo lease in 2 seconds.

RISK Index gaps on Linux. NT builds its own small index on first run, with permission.

NT
Launch post draft

I typed "the lease from last spring" and it found it.

normie-tools/skills/find-a-file

NT 49 DAILY BRIEFINGS

Morning Briefing

One short page each morning: today's weather and alerts, your calendar, bills due, and a calm news summary.

EFFORT S
WOW ●●●●● 5/5

Works in Claude, ChatGPT, Grok, and the NT App | Uses free official data | Ship first, #5

Who it helps

Busy people, older adults, and anyone who wants one calm place to start the day.

Get ready

1. Tell NT your town or ZIP code once (saved in My Info).
2. Optional: connect your calendar and email so it can include them.

What you get

A one-screen briefing, also printable as a one-page PDF.

What you say

YOU Give me my morning briefing.

What happens

1. NT checks the National Weather Service for your area, your calendar, and bills due this week.
2. It adds three calm news headlines with links, and nothing scary for clicks.
3. You read it in one minute. In the NT App it can be ready every morning at the time you pick.

NT WILL NEVER

- Never shows outrage headlines or ads.
- Never reads your email out loud to others or sends anything.

CHECKED NOVEMBER 4, 2026

SOURCES Weather and alerts from api.weather.gov (free, open data). Calendar and email through the person's own read-only connection. News from the News Briefing sources.

For builders

normie-tools/skills/morning-briefing

SKILL Composes Weather Briefing, Calendar (read-only), Bill Due Reminders, and News Briefing into one page with a fixed, calm layout.

ENGINE brief.py fetches NWS data and formats the page; the model writes only the three-line summary.

TEST Recorded API responses for 10 fake days. Pass bar: alerts always shown first, no missing sections.

DEMO Staged, made-up files, demo account. Staged: a demo morning with a wind advisory at the top and two calendar items.

RISK Missed alert. Active NWS alerts always render first and are never summarized away.

NT
Launch post draft

Every morning, one calm page: weather alerts, my day, bills due, three headlines.

normie-tools/skills/morning-briefing

NT 50 DAILY BRIEFINGS

Weather Briefing

Today's weather in plain words, and any severe-weather warning for your area shown first and clearly.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, Grok, and the NT App

Uses free official data

Who it helps

Anyone, especially people caring for kids, older adults, or pets, or who work outside.

Get ready

1. Tell NT your town or ZIP code. Nothing else.

What you get

A short briefing on screen, and an optional alert in the NT App when a warning is issued.

What you say

YOU What's the weather today, and is anything dangerous coming?

What happens

1. NT checks the free National Weather Service data for your exact area.
2. If there is a warning, it shows it first with what to do, in plain words.
3. Then it gives you today and the next few days in two or three lines.

NT WILL NEVER

- Never replaces official alerts. It always links to weather.gov and says to follow local officials.
- Never guesses a forecast. It only uses the official one.

CHECKED NOVEMBER 4, 2026

SOURCE National Weather Service API at api.weather.gov. Open data, free to use for any purpose, no key; a User-Agent with contact info is required.

LIMITS Rate limits exist but are not public. US only, no radar images. The API allows browser requests from any site (checked: Access-Control-Allow-Origin is *), so the website runs it on the device.

For builders

normie-tools/skills/weather-briefing

SKILL Uses api.weather.gov: /points to find the forecast grid, /gridpoints forecast, and /alerts/active for the area. Sends a User-Agent with contact info as the API requires.

ENGINE weather.py does the two-step lookup, caches the grid, and formats alerts first.

TEST Recorded responses including a tornado warning and a heat advisory. Pass bar: alert shown first in every case.

DEMO Staged, made-up files, demo account. Staged: a recorded winter storm warning shown at the top in big text.

RISK US only. The NWS API covers the United States; outside the US NT says so instead of guessing.

NT
Launch post draft

My AI checks the official weather service and tells me first if something dangerous is coming.

normie-tools/skills/weather-briefing

NT 51 DAILY BRIEFINGS

News Briefing

The day's main news in a few calm lines, with links to the original stories, and no outrage.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, Grok, and the NT App | Uses free official data

Who it helps

People who want to stay informed without doomscrolling.

Get ready

1. Pick the news sources you trust from a short list, or add your own.
2. Optional: pick topics like local, health, or money.

What you get

A short list on screen with the source name and a link for every item.

What you say

YOU Give me today's news in five calm lines.

What happens

1. NT reads today's headlines from the sources you picked.
2. It picks the main stories, writes one plain line each, and skips scary wording.
3. Every line links to the original story so you can read more.

NT WILL NEVER

- Never makes up news or uses unnamed sources.
- Never copies whole articles. It links to them.

CHECKED NOVEMBER 4, 2026

IN CHAT APPS	Uses the app's own web search, which shows links to each source.
IN THE NT APP	RSS feeds the person picks. Example: NPR allows its feeds for personal, noncommercial use with credit and a link, but does not allow changes or AI training, so NT shows those headlines unchanged.
TO CONFIRM	Each publisher's feed terms before it goes on the default list.

For builders

normie-tools/skills/news-briefing

SKILL	In chat apps, uses the app's own web search and cites each source. In the NT App, reads RSS headlines the person picks and shows them as published with a link, following each publisher's feed terms.
ENGINE	news.py reads the picked feeds and removes duplicates; summaries are only made where the source's terms allow.
TEST	Saved feed snapshots. Pass bar: every item has a working source link, no item without a source.
DEMO	Staged, made-up files, demo account. Staged: five calm headlines from saved demo feeds.
RISK	Publisher terms. Some feeds (for example NPR's) allow personal, noncommercial use but limit changes and AI use; NT shows those headlines unchanged.

NT
Launch post draft

Five calm lines of news, every one linked to the source. No doomscrolling.

normie-tools/skills/news-briefing

NT 52 EMAIL, CALENDAR, AND CONTACTS

Email Organizer

Get your inbox sorted into a few simple folders, with a plan you approve first.

EFFORT M

WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Uses your email or calendar connection | On the NT website

Who it helps

People with thousands of unread emails who don't know where to start.

Get ready

1. In your AI app, connect your Gmail or Outlook once (look for Connectors or Plugins).
2. That's it. NT only reads at first.

What you get

- A plain plan, and for Gmail a filters file (.xml) you can import in Settings, Filters.

What you say

YOU Look at my inbox and help me organize it. Don't change anything until I say yes.

What happens

1. NT reads your recent mail and suggests a few groups, like Bills, School, Shopping, and Newsletters.
2. You say yes, no, or change a group.
3. NT applies labels only where your app allows it with your OK. Otherwise it gives you a filter file to import in Gmail settings.

NT WILL NEVER

- Never deletes or sends email.
- Never changes anything before you say yes.

For builders

normie-tools/skills/email-organizer

SKILL Read-only scan of recent threads through the app's mail connector, proposes 4 to 6 groups with example senders, then either asks to apply labels one batch at a time (where the connector supports it) or writes a Gmail filters XML.

ENGINE filters.py builds Gmail filter XML. In coding tools it can read a mailbox export (.mbox) offline.

TEST Fake mailbox export with 2,000 messages and known groups. Check plan quality and that no write runs before a yes.

DEMO Staged, made-up files, demo account. A fake inbox with 2,000 unread becomes five groups after one yes.

RISK Unwanted changes. Read-only first, batch approvals, and no delete or send actions in the skill at all.

NT
Launch post draft

2,000 unread emails. One plan, one yes. Nothing deleted, nothing sent.

normie-tools/skills/email-organizer

NT 53 EMAIL, CALENDAR, AND CONTACTS

Newsletter Cleanup

Find the mailing lists that flood your inbox and get a list of how to leave each one.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Uses your email or calendar connection | On the NT website

Who it helps

Anyone who gets 50 store emails a day.

Get ready

1. Connect your email in your AI app once.
2. Or save a few marketing emails and attach them.

What you get

- A spreadsheet of senders with counts and unsubscribe links.

What you say

YOU Which emails do I get the most of, and which should I unsubscribe from?

What happens

1. NT counts senders over the last few months, read-only.
2. It shows you the top 20 with how often each one emails you.
3. You pick which to leave. NT lists each one's unsubscribe link for you to click yourself.

NT WILL NEVER

- Never clicks unsubscribe links for you.
- Never deletes email.

For builders

normie-tools/skills/newsletter-cleanup

SKILL Counts senders, reads List-Unsubscribe headers where visible, flags lookalike senders as possible scams.

ENGINE senders.py counts senders from an .mbox export.

TEST Fake mailbox with planted lists.

DEMO Staged, made-up files, demo account. A fake inbox shows the 20 noisiest senders.

RISK Scam links. Links are shown with their real domain, and the user clicks.

NT
Launch post draft

Found the 20 stores that email me most. Left them all in five minutes.

normie-tools/skills/newsletter-cleanup

NT 54 EMAIL, CALENDAR, AND CONTACTS

Bills and Receipts from Email

Pull every bill and receipt out of your email into one spreadsheet.

EFFORT M
WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Uses your email or calendar connection | On the NT website

Who it helps

Anyone who needs last year's receipts for a refund, a budget, or taxes.

Get ready

1. Connect your email in your AI app once.

What you get

- A spreadsheet with a link back to each email.

What you say

YOU Find all my receipts and bills from email this year and put them in a spreadsheet.

What happens

1. NT searches your mail for receipts and bills, read-only.
2. It lists store, date, and amount, and marks ones it isn't sure about.
3. You download the spreadsheet. It also works with Bank CSV to Tax Categories.

NT WILL NEVER

- Never opens attachments it doesn't need.
- Never forwards anything.

For builders

normie-tools/skills/email-bills

SKILL Search queries for receipts, invoices, and statements; extracts fields from message bodies; links each row to its thread.

ENGINE From an .mbox export in coding tools.

TEST Fake receipts mailbox with a known answer key.

DEMO Staged, made-up files, demo account. A year of fake receipts becomes one sheet.

RISK Attachment content may be invisible to some connectors. The skill says when it only saw the email body.

NT
Launch post draft

All my email receipts in one spreadsheet, without forwarding a single one.

normie-tools/skills/email-bills

NT 55 EMAIL, CALENDAR, AND CONTACTS

Calendar Cleanup

Remove duplicate and junk events from your calendar the safe way.

EFFORT M

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

People whose calendar shows every event twice after switching phones.

Get ready

1. Google Calendar: on a computer, open Settings, then Import and export, then Export.
2. iPhone or Outlook: export or share the calendar as a file.
3. Attach the file.

What you get

A clean calendar file (.ics) and a list of what was removed.

What you say

YOU My calendar has doubles of everything. Clean it up.

What happens

1. You attach your calendar file.
2. NT finds doubles, old test events, and broken repeats, and shows you the list.
3. You download a clean calendar file and import it into a new calendar, then hide the old one.

NT WILL NEVER

- Never deletes from your real calendar.
- Never touches events it isn't sure about.

For builders

normie-tools/skills/calendar-cleanup

SKILL Parses .ics, groups duplicates by title, time, and location, keeps the richest copy, writes a new file and a change log. Import into a new calendar first so nothing is lost.

ENGINE ics_dedupe.py, shared with Family Calendar Merge.

TEST Fake calendars with planted doubles and tricky repeats.

DEMO Staged, made-up files, demo account. A fake calendar with 300 doubles becomes clean.

RISK Losing events. The original is never changed and the clean file goes into a new calendar first.

NT
Launch post draft

Every event in my calendar showed up twice. One file in, one clean file out.

normie-tools/skills/calendar-cleanup

NT 56 EMAIL, CALENDAR, AND CONTACTS

Family Calendar Merge

Combine school, sports, and work calendars into one family calendar file.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Parents juggling three school calendars and a practice schedule.

Get ready

1. Download each calendar file, or save the school's calendar link.
2. Attach them all.

What you get

- One combined calendar file (.ics) and a list of clashes.

What you say

YOU Merge these calendars into one family calendar and put each kid's name in front of their events.

What happens

1. You attach the calendars.
2. NT combines them, adds names, and points out times that clash.
3. You download one calendar file to import or share with your family.

NT WILL NEVER

- Never invites or emails anyone.

For builders

normie-tools/skills/family-calendar

SKILL Merges .ics files, prefixes events per source, finds overlaps, writes one file.

ENGINE Shared ics_dedupe.py.

TEST Fake school and sports calendars with planted clashes.

DEMO Staged, made-up files, demo account. Three fake calendars become one with clash warnings.

RISK Time zones. Ask once and set it in the file.

NT
Launch post draft

Three school calendars, one family calendar, every clash flagged.

normie-tools/skills/family-calendar

NT 57 EMAIL, CALENDAR, AND CONTACTS

Syllabus to Calendar

Turn a syllabus or school email into calendar reminders for every due date.

EFFORT S

WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Students, and parents who get long school emails.

Get ready

1. Download the syllabus PDF from the class page, or copy the school email.

What you get

A calendar file (.ics) and a list of dates.

What you say

YOU Here's my biology syllabus. Put every test and due date on my calendar, with a reminder two days before.

What happens

1. You attach the syllabus.
2. NT lists every date it found and asks about any that are unclear.
3. You download one calendar file and open it.

NT WILL NEVER

- Never adds anything to your calendar without you opening the file.

For builders

normie-tools/skills/syllabus-to-calendar

SKILL Finds dates and relative dates ("Week 3 Tuesday"), pairs each with the task, confirms, writes .ics with alarms.

ENGINE syllabus.py with dateparser for small models.

TEST 10 fake syllabi with a known date list.

DEMO Staged, made-up files, demo account. A fake syllabus fills a semester calendar.

RISK Wrong dates. The list is always shown first.

NT
Launch post draft

Gave my AI my syllabus and the whole semester showed up in my calendar.

normie-tools/skills/syllabus-to-calendar

NT 58 EMAIL, CALENDAR, AND CONTACTS

Appointment Prep

Get a one-page sheet for a doctor or school meeting: what to bring and what to ask.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Anyone who forgets their questions the moment the doctor walks in.

Get ready

1. Nothing to download. Tell NT about the visit.
2. Optional: connect your calendar so NT can see the date and place.

What you get

A one-page prep sheet PDF.

What you say

YOU I see the doctor Thursday about my knee. Help me get ready.

What happens

1. NT asks a few short questions about what's going on.
2. It writes your questions in plain words and a list of what to bring.
3. You download a one-page sheet to print or keep on your phone.

NT WILL NEVER

- Never gives a diagnosis.
- Never contacts the office.

For builders

normie-tools/skills/appointment-prep

SKILL Question flow by visit type (doctor, school, benefits office), with a symptom timeline and a bring list. States it is not medical advice.

ENGINE None needed. Template only.

TEST Reviewed sample outputs for tone and reading level.

DEMO Staged, made-up files, demo account. A person answers three questions and prints a neat sheet.

RISK Medical advice. The skill only organizes what the person says.

NT
Launch post draft

Walk into your next appointment with your questions ready.

normie-tools/skills/appointment-prep

NT 59 EMAIL, CALENDAR, AND CONTACTS

Contacts Cleanup

Merge duplicate contacts and fix phone numbers, then put them back on your phone.

EFFORT M

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone with three entries for Mom.

Get ready

1. Google Contacts: on a computer, choose Export, then vCard.
2. iPhone: on a computer, sign in to iCloud.com, open Contacts, select all, then Export vCard.
3. Attach the file.

What you get

A clean contacts file (.vcf) and a list of merges.

What you say

YOU Clean up my contacts. Merge doubles, but show me anything you're not sure about.

What happens

1. You attach your contacts file.
2. NT merges clear doubles and fixes number formats. It lists the unsure ones for you.
3. You download a clean file and import it. Your old file is your backup.

NT WILL NEVER

- Never drops a number or email.
- Never messages anyone.

For builders

normie-tools/skills/contacts-cleanup

SKILL Parses vCard and CSV, finds doubles by name, phone, and email, merges without losing fields, normalizes numbers to international format.

ENGINE contacts.py with phonenumbers and lossless-merge tests.

TEST Fake contacts with planted doubles. Test that every number survives.

DEMO Staged, made-up files, demo account. Three entries for Mom become one.

RISK Data loss. Every field is kept and the original file is the backup.

NT
Launch post draft

Three contacts named Mom? One file in, one clean file out.

normie-tools/skills/contacts-cleanup

NT 60 EMAIL, CALENDAR, AND CONTACTS

Holiday Card Address List

Turn your contacts into a clean mailing list and print-ready address labels.

EFFORT S

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info

Who it helps

Families sending holiday cards, invitations, or thank-you notes.

Get ready

1. Export your contacts as in Contacts Cleanup, or paste a list of names.

What you get

- A label PDF for standard label sheets and a mailing list spreadsheet.

What you say

YOU Make address labels for everyone in my Family and Friends group.

What happens

1. You attach your contacts and pick who's on the list.
2. NT finds missing or old addresses and lists them for you.
3. You download a sheet of labels for common label paper and a spreadsheet.

NT WILL NEVER

- Never mails or messages anyone.

For builders

normie-tools/skills/address-labels

SKILL Filters contacts by group, formats addresses, flags missing ones, lays out common label sizes.

ENGINE labels.py renders label sheets.

TEST Print tests on real label paper.

DEMO Staged, made-up files, demo account. A contacts file becomes a sheet of labels.

RISK Label sizes vary. Offer the common ones and a test page.

NT
Launch post draft

Holiday cards in an afternoon. Contacts in, labels out.

normie-tools/skills/address-labels

NT 61 HOME AND HEALTH

Recipe to Grocery List

Turn recipe links into one grocery list sorted by store aisle.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Home cooks planning a week of meals.

Get ready

1. Copy the recipe links from your browser.

What you get

- A grocery list you can paste into your notes app, or a PDF.

What you say

YOU Make one shopping list for these three recipes. Double the chili. I have rice.

What happens

1. You paste the links.
2. NT reads each recipe, combines amounts, and removes what you have.
3. You get a list sorted by aisle.

NT WILL NEVER

- Never orders groceries.

For builders

normie-tools/skills/recipe-to-list

SKILL Reads recipe structured data when the app can browse, merges and scales.

ENGINE recipes.py parses schema.org Recipe data.

TEST 20 example recipes.

DEMO Staged, made-up files, demo account. Three links become one sorted list.

RISK Unit merge errors. Keep unlike units separate.

NT
Launch post draft

Three recipe links in, one grocery list out.

normie-tools/skills/recipe-to-list

NT 62 HOME AND HEALTH

Weekly Meal Planner

Plan a week of dinners on a budget and get the grocery list with it.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Busy families and anyone tired of "what's for dinner".

Get ready

1. Nothing to download. Tell NT your budget and likes.

What you get

- A meal plan PDF, a grocery list, and an optional calendar file.

What you say

YOU Plan five cheap dinners for a family of four. No fish. One kid hates onions.

What happens

1. NT suggests five dinners and asks if you want swaps.
2. It makes a grocery list for the whole week.
3. You download the plan and list, and a calendar file if you want dinner on your calendar.

NT WILL NEVER

- Never orders food.
- Never gives diet or medical advice.

For builders

normie-tools/skills/meal-planner

SKILL Plan and list templates with allergy notes the person confirms.

ENGINE Shared recipes.py and ics_writer.py.

TEST Reviewed sample plans.

DEMO Staged, made-up files, demo account. A week of dinners and one list.

RISK Allergies. The person confirms every allergy note.

NT
Launch post draft

"What's for dinner" solved for the week, with the grocery list.

normie-tools/skills/meal-planner

NT 63 HOME AND HEALTH

Medicine Schedule

Turn "twice a day for 10 days" into reminders and a fridge chart.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Parents and caregivers sharing medicine duty.

Get ready

1. Take a photo of the label, or type what it says.

What you get

A calendar file (.ics) and a printable chart.

What you say

YOU The label says every 12 hours for 10 days, starting tonight at 8. Make reminders and a chart.

What happens

1. You share the label words.
2. NT repeats them back and shows each dose time.
3. You download reminders and a check-off chart.

NT WILL NEVER

- Never suggests amounts or changes directions.

For builders

normie-tools/skills/med-schedule

SKILL Copies label directions exactly, schedules within waking hours only when allowed, asks when unclear.

ENGINE Shared ics_writer.py.

TEST Label phrase tests.

DEMO Staged, made-up files, demo account. A fake label becomes 20 reminders and a chart.

RISK Medical risk. Schedules only what the label says.

NT
Launch post draft

Twice a day for 10 days, shared by two parents, no missed doses.

normie-tools/skills/med-schedule

NT 64 HOME AND HEALTH

Home Inventory

Walk through your home with your phone and get an inventory list for insurance.

EFFORT M

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Renters and homeowners setting up or using insurance.

Get ready

1. Take photos of each room and of labels on big items.

What you get

An inventory spreadsheet and a PDF report.

What you say

YOU Here are photos of my apartment. Make an inventory for my renters insurance.

What happens

1. You attach the photos.
2. NT lists items by room and reads serial numbers it can see.
3. You download a spreadsheet and a PDF report.

NT WILL NEVER

- Never guesses prices unless you ask, and marks guesses.

For builders

normie-tools/skills/home-inventory

SKILL Vision-based item listing with marked guesses.

ENGINE inventory.py builds the report.

TEST Staged room photos.

DEMO Staged, made-up files, demo account. Staged room photos become a 24-item list.

RISK Privacy. Store the file safely.

NT
Launch post draft

Insurance wants a list of everything you own. Your phone and your AI can make it.

NT 65 HOME AND HEALTH

Moving Checklist

Get a dated moving plan and a list of everyone to tell your new address.

EFFORT S

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Anyone moving in the next two months.

Get ready

1. Nothing to download. Tell NT your move date.

What you get

A checklist PDF and a calendar file (.ics).

What you say

YOU I'm moving on March 15. Make me a plan and remind me what to do each week.

What happens

1. NT asks about kids, pets, and utilities.
2. It builds a week-by-week plan and an address-change list.
3. You download a checklist and a calendar file.

NT WILL NEVER

- Never changes your address anywhere for you.

For builders

normie-tools/skills/moving-checklist

SKILL Week-by-week template keyed to the move date.

ENGINE Shared ics_writer.py.

TEST Reviewed plan.

DEMO Staged, made-up files, demo account. A move date becomes a calendar of tasks.

RISK Missing items. List is editable.

Moving in March? One chat makes the whole plan.

normie-tools/skills/moving-checklist

NT 66 HOME AND HEALTH

Calorie Counter

Track what you eat by typing it or snapping a photo, with numbers from the USDA food database.

EFFORT M

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Adults who want to understand their eating, gently and without an expensive app.

Get ready

1. Nothing to download. Type what you ate, or take a photo of your plate or the food label.

What you get

A daily log (CSV) and a weekly one-page summary.

What you say

YOU I had two eggs, toast with butter, and coffee with milk. How many calories?

What happens

1. NT matches each food to the USDA FoodData Central database and asks about portion size if unsure.
2. It shows calories and protein, carbs, and fat, and marks photo guesses as rough.
3. You keep a simple daily log. Each week you get a plain summary.

NT WILL NEVER

- Never gives medical or diet advice, or sets very low calorie goals.
- Never gives calorie targets to anyone under 18. It suggests talking to a doctor for health conditions or pregnancy.

CHECKED NOVEMBER 4, 2026

SOURCE USDA FoodData Central. Public domain (CC0 1.0). Free API with a data.gov key, 1,000 requests per hour per IP, plus full CSV and JSON downloads for offline use. USDA asks apps to credit FoodData Central.

For builders

normie-tools/skills/calorie-counter

SKILL Food matching to FoodData Central (Foundation, SR Legacy, Branded), portion questions, label reading from photos, gentle tone rules, and a floor on any goal the person sets with a doctor-referral line.

ENGINE nutrition.py looks foods up in a bundled FoodData Central download, so no API key ships in the browser and no request leaves the device.

TEST 200 logged meals with known USDA values. Pass bar: within 5% for typed foods; photo estimates always labeled rough.

DEMO Staged, made-up files, demo account. Staged: a typed breakfast and a photo of a demo label.

RISK Eating disorders and health conditions. Neutral language, no streaks or shaming, and a clear see-a-doctor line.

NT
Launch post draft

I typed my breakfast. My AI used the USDA food database to count it, no app, no ads.

normie-tools/skills/calorie-counter

Workout Plan

Get a simple, safe weekly plan that fits your time, space, and fitness level, with no gym needed.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Beginners, busy parents, older adults, and anyone starting again.

Get ready

1. Nothing to download. Answer a few questions about time, space, and how active you are now.

What you get

- A printable weekly plan PDF with simple pictures by name, and workout reminders (.ics).

What you say

YOU Make me a beginner workout plan. 20 minutes, 3 days a week, at home.

What happens

1. NT asks about your time, equipment, and any limits, and suggests checking with a doctor if you have a health condition.
2. It builds a week of easy-to-follow sessions, starting gentle and building slowly.
3. You get a printable plan and calendar reminders, and can tell NT how it went to adjust next week.

NT WILL NEVER

- Never gives medical advice or plans for injuries or conditions. It says to see a doctor or physical therapist.
- Never pushes past safe starting levels. Pain means stop.

CHECKED NOVEMBER 4, 2026

GUIDELINE US Physical Activity Guidelines for Americans, 2nd edition: adults 150 to 300 minutes a week of moderate activity (or 75 to 150 vigorous), plus muscle strengthening 2 or more days. Inactive people should "start low and go slow"; people with chronic conditions should be under a provider's care.

For builders

normie-tools/skills/workout-plan

SKILL Plan builder anchored to the US Physical Activity Guidelines for Americans (aerobic minutes and two days of muscle strengthening per week for adults), with beginner progressions and a screening question set.

ENGINE plan.py builds the weekly grid and .ics reminders.

TEST 30 personas (time, space, age band). Pass bar: every plan within guideline ranges and starting levels; screening questions always asked.

DEMO Staged, made-up files, demo account. Staged: a 20-minute, 3-day home plan prints on one page.

RISK Injury. Screening questions first, gentle progressions, and stop-if-it-hurts in every plan.

NT

NT 68 HOME AND HEALTH

New Phone Setup Guide

Move to a new phone without losing photos, contacts, or messages, one simple step at a time.

EFFORT S
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Anyone switching phones, especially people who usually need a family member to help.

Get ready

1. Have both phones charged and on Wi-Fi.
2. Tell NT which phones you have, like "old Android to new iPhone".

What you get

- A printable checklist for your exact two phones, and a done list.

What you say

YOU I got a new iPhone. Help me move everything from my old Android.

What happens

1. NT gives you one step at a time, with what you should see on screen.
2. Before anything else, it checks that your photos and contacts are backed up.
3. At the end, it helps you set up large text, emergency contacts, and scam call filtering.

NT WILL NEVER

- Never tells you to reset the old phone until you check everything moved.
- Never asks for your passwords.

For builders

normie-tools/skills/new-phone-setup

SKILL Guided walkthroughs keyed to the official transfer tools for each phone pair, with a backup-first gate and accessibility setup at the end. Each path cites the phone maker's own help page.

ENGINE None needed. Steps are kept in a versioned table per phone pair.

TEST Real phone pairs tested by a person following only NT's steps. Pass bar: every pair finished with nothing lost.

DEMO Staged, made-up files, demo account. Staged: demo phones, one step on screen at a time.

RISK Phone menus change each year. Each path is re-tested after major phone software updates.

NT
Launch post draft

New phone, nothing lost. My AI walked me through it one step at a time.

normie-tools/skills/new-phone-setup

NT 69 WORK AND SCHOOL

Simple Invoice Maker

Make a clean, numbered invoice for side work in one message.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Babysitters, tutors, handymen, and small business owners.

Get ready

1. Nothing to download. Just say what you did and for whom.

What you get

- An invoice PDF and an invoice log spreadsheet.

What you say

YOU Make an invoice for Maria: 6 hours of tutoring at 30 dollars an hour, due in two weeks.

What happens

1. You say the client, work, and price.
2. NT shows a preview and asks for anything missing, like your name and how to pay.
3. You download a PDF invoice and a running list of all your invoices.

NT WILL NEVER

- Never sends the invoice.
- Never adds tax rates on its own. You give them.

For builders

normie-tools/skills/invoice-maker

SKILL Invoice template, numbering rule, totals check, and a log the user re-attaches next time.

ENGINE invoice.py renders the PDF and keeps numbers in order.

TEST Totals and numbering tests.

DEMO Staged, made-up files, demo account. One sentence becomes a neat invoice PDF.

RISK Wrong totals. The script checks the math.

NT
Launch post draft

One sentence, one invoice. Free for side hustles.

normie-tools/skills/invoice-maker

NT 70 WORK AND SCHOOL

Job Application Tracker

Keep every job you applied to in one list, with follow-up reminders.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file or use your email | On the NT website

Who it helps

Job seekers sending lots of applications.

Get ready

1. Connect your email in your AI app, or paste the job links.

What you get

A tracker spreadsheet and a calendar file (.ics).

What you say

YOU Make a list of the jobs I applied to this month and remind me to follow up after a week.

What happens

1. NT finds application confirmations in your email (read-only) or reads the links you paste.
2. It fills a list: company, job, date, status.
3. You download the list and a calendar file with follow-up reminders.

NT WILL NEVER

- Never applies or emails employers for you.

For builders

normie-tools/skills/job-tracker

SKILL Search queries for confirmations, fields, and follow-up dates.

ENGINE Shared ics_writer.py.

TEST Fake confirmations mailbox.

DEMO Staged, made-up files, demo account. A fake inbox becomes a 15-job tracker.

RISK Wrong status. The person updates status themselves.

NT
Launch post draft

Every job I applied to, in one list, with follow-up reminders.

NT 71 WORK AND SCHOOL

Resume Formatter

Turn a messy resume into a clean, simple one-page resume.

EFFORT S

WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website | Fills from My Info

Who it helps

People who haven't updated a resume in years.

Get ready

1. Attach your old resume, or just type your jobs.

What you get

A resume as DOCX and PDF.

What you say

YOU Make my resume look clean and fit on one page. Here's the old one.

What happens

1. You attach your resume.
2. NT keeps your facts and puts them in a clean layout. It asks before it changes any words.
3. You download a DOCX and a PDF.

NT WILL NEVER

- Never adds jobs or skills you didn't give.

For builders

normie-tools/skills/resume-formatter

SKILL Plain template, fact-preserving rewrite with a diff the person approves.

ENGINE resume.py renders DOCX.

TEST Test that no new facts appear.

DEMO Staged, made-up files, demo account. A cluttered resume becomes a clean one page.

RISK Invented facts. A diff shows every change.

NT
Launch post draft

Old resume in, clean one-pager out. No made-up skills.

normie-tools/skills/resume-formatter

NT 72 WORK AND SCHOOL

Voice Memo to Notes

Turn a voice memo into clean notes and a to-do list.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Attach a file | On the NT website

Who it helps

Anyone who records thoughts while driving or walking.

Get ready

1. On iPhone, open the memo and copy its transcript if your phone shows one.
2. Or attach the audio file if your AI app accepts audio.

What you get

A notes document with a checklist.

What you say

YOU Turn this memo into notes and a to-do list for this week.

What happens

1. You attach the transcript or audio.
2. NT writes a short summary and a checklist.
3. You download the notes.

NT WILL NEVER

- Never guesses at words it couldn't hear. It marks them.

For builders

normie-tools/skills/memo-to-notes

SKILL Summary and action extraction from transcript text. Audio support depends on the app: to confirm per app.

ENGINE transcribe.py runs whisper.cpp locally in coding tools.

TEST Scripted memos with known actions.

DEMO Staged, made-up files, demo account. A rambling memo becomes four to-dos.

RISK Consent. Remind people to ask before recording others.

NT
Launch post draft

Voice memo in, to-do list out.

normie-tools/skills/memo-to-notes

NT 73 SAFETY

Scam Check

Paste a strange text or email and see where its links really go.

EFFORT S

WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Older relatives and anyone who got a "package held" text.

Get ready

1. Long-press the message, copy it, and paste it into your AI app. Or take a screenshot.

What you get

A short report.

What you say

YOU My mom got this text saying her bank account is locked. Is it real?

What happens

1. You paste the message.
2. NT shows the real web address of every link and the warning signs, without opening them.
3. You get a plain answer and what to do next.

NT WILL NEVER

- Never opens the links.
- Never calls numbers from the message.

For builders

normie-tools/skills/scam-check

SKILL Domain parsing, lookalike checks, sign checklist with quotes, and "contact the company through its official site" advice.

ENGINE linkcheck.py (public suffix list) for coding tools and small models.

TEST 30 fake scam and safe messages with reserved example domains.

DEMO Staged, made-up files, demo account. A lookalike link is caught.

RISK "No signs" is not proof of safety. Say so.

NT
Launch post draft

Paste a sketchy text, see where the link really goes. Your AI never clicks it.

normie-tools/skills/scam-check

NT 74 SAFETY

Scam Recovery Plan

If you think you were scammed or your identity was stolen, get a calm step-by-step plan, the official places to report, and letters ready to send.

EFFORT S
WOW ●●●●● 5/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Anyone who just sent money, gave out a code, or found an account they didn't open.

Get ready

1. Nothing to download. Tell NT what happened in your own words.
2. Optional: screenshots of the messages or charges.

What you get

A step-by-step plan PDF, filled-in letters, and a checklist with dates.

What you say

YOU I think I got scammed. I gave someone my bank code on the phone.

What happens

1. NT tells you the first 3 things to do right now, like calling your bank's fraud number from your card.
2. It gives you the official places to report, like ReportFraud.ftc.gov and IdentityTheft.gov.
3. It fills in letters and a checklist for your bank and credit bureaus, for you to send yourself.

NT WILL NEVER

- Never asks for passwords, codes, or full account numbers.
- Never contacts anyone for you, and never offers "recovery" services, which are often scams themselves.

CHECKED NOVEMBER 4, 2026

WHY IT MATTERS FTC: about 3 million fraud reports and $15.9 billion lost in 2025; imposter scams were the most reported; people 50 and older reported $4.3 billion lost (as reported by AARP). Official sites: ReportFraud.ftc.gov, IdentityTheft.gov, ic3.gov.

For builders

normie-tools/skills/scam-recovery

SKILL Triage by what was lost (money, codes, ID numbers, accounts), then official steps from FTC, IdentityTheft.gov, and IC3; letter templates filled from My Info.

ENGINE plan.py builds the dated checklist and letters.

TEST 40 scam stories with expert-reviewed correct first steps. Pass bar: 100% include "contact your bank" when money moved, 0 non-official links.

DEMO Staged, made-up files, demo account. Staged: a demo "bank code" story turns into a 3-step plan and two letters.

RISK Panic and bad links. Calm wording, only official .gov sites, and a reminder that recovery offers are scams.

NT
Launch post draft

Got scammed? Your AI gives you a calm plan and the official places to report. In minutes.

normie-tools/skills/scam-recovery

NT 75 SAFETY

Password Checkup Guide

Use your phone or browser's own password checkup, with plain steps. Never paste a password.

EFFORT S

WOW ●●●●○ 4/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website

Who it helps

Anyone who knows they reuse passwords.

Get ready

1. Nothing to download. Have your phone or computer ready.

What you get

A short fix-first list you keep.

What you say

YOU Help me check if my passwords are safe.

What happens

1. NT asks what phone and browser you use.
2. It walks you to the built-in password checkup, one step at a time.
3. You fix the most important accounts first: email, then bank.

NT WILL NEVER

- Never asks for or reads a password.
- Never asks you to upload a password file.

For builders

normie-tools/skills/password-checkup

SKILL Step guides for the built-in checkups on common phones and browsers, with a hard rule to refuse any password paste.

ENGINE None needed.

TEST Red-team prompts that try to paste passwords. The skill must refuse.

DEMO Staged, made-up files, demo account. A person finds 3 reused passwords using their phone's checkup.

RISK Menus change. Ask for a screenshot each step.

NT
Launch post draft

Your AI helps you fix passwords without ever seeing one.

NT 76 SAFETY

Account Recovery Kit

Get ready before you get locked out: backup codes, recovery email, and a printed checklist.

EFFORT S
WOW ●●●○○ 3/5

Works in Claude, ChatGPT, and Grok | Just chat | On the NT website | Fills from My Info

Who it helps

Anyone who would be stuck if they lost their phone.

Get ready

1. Nothing to download.

What you get

A printable checklist PDF.

What you say

YOU Help me make sure I can get back into my email if I lose my phone.

What happens

1. NT asks which accounts matter most.
2. It walks you through each account's recovery settings, one step at a time.
3. You print a checklist that says where your backup codes are kept, not the codes.

NT WILL NEVER

- Never asks for codes or passwords.

For builders

normie-tools/skills/recovery-kit

SKILL Step guides for common account recovery settings with a locations-only rule.

ENGINE None needed.

TEST Refusal tests for codes and passwords.

DEMO Staged, made-up files, demo account. A person sets up a recovery email in four steps.

RISK Menus change. Ask for a screenshot each step.

NT
Launch post draft

Lose your phone, keep your accounts.

NT BRAND SHEET VERSION 1, NOVEMBER 4, 2026

How NT looks and sounds

Logo

One ligature: the right stem of the N rises into the crossbar of the T, with round ends and a Tomato dot that reads as "done". Clear space equals the dot's width. Minimum 16 px on screen, 6 mm in print. Don't stretch, recolor, outline, or add effects. The same mark is the app icon, the website icon, and the Home Screen icon.

Name and voice

BRAND NT, always two capital letters, no periods.

REPO `normie-tools`, skills in `normie-tools/skills/<slug>`.

LINE Small tools for everyday things. Use them yourself, or ask your agent.

- **Friendly, not cute.** "Your receipts, in a spreadsheet."
- **Plain, not technical.** "Download your bank file." Not "Export a CSV."
- **Honest, not hyped.** "Check the dates before you import."

Type

Fraunces, soft

Headings and big moments. Weight 600 to 700.

Figtree for everything you read

Body, labels, buttons. 400, and 600 for emphasis.

`IBM Plex Mono` for file and command names, builder sections only. All SIL Open Font License.

Color

Ink	Tomato	Tomato Deep	Paper	Text	Muted
#134E3A	#E4572E	#B23C19	#F7F2E8	#1F2A24	#5B6660
